CBIT-GSP: lessons learned

Transparency remains core to the Paris Agreement. Parties needs to continue building trust on transparent reporting in NDC actions and implementations, FTC (finance, technology transfer and capacity building)

- Understanding the stakeholders – ‘political buy-in’, ‘blessings from the government’ – country driven bottom-up approach
- In-country logistical support and local expenses (venue, catering, local transport etc.)
- Taking stock on current activities
- Stakeholders’ availability and planning
- Inclusiveness – gender, youth and community
- Guidance from the Coordinating Agency
- Collaboration with development partners
- Background materials for technical presentations
- Technological challenge
- Challenges with online sessions
- Effectiveness of face-to-face learning (acknowledging traditional custom and knowledge)

CBIT-GSP: challenges and opportunities

CBIT-GSP
CLIMATE TRANSPARENCY

Challenges

- Overall awareness of reporting requirements under the UNFCCC and the Paris Agreement
- Changes in priorities
- Multiple development partners with diverse portfolios
- Tangible or concrete outcome
- Absorption capacity (in the context of each PICs, considering socio-economy and government settings)

Opportunities

- First-of-its-kind
- Multi-party platform
- Building future transparency workforce
