ASIA-PACIFIC STATS CAFE SERIES

Stats Café

Good coffee makes your day, but good data helps you decide.

2022 ASIA & THE PACIFIC REGIONAL TRENDS ON FORCED DISPLACEMENT

MONDAY, 18 JULY 2022, 14:00-15:00 (UTC+7)

The number of displaced and stateless people in Asia and the Pacific reached 11.3 million people at the end of 2021. These were of 4.2 million refugees, 4.4 million internally displaced people, 2.4 million stateless (includes stateless displaced), 1.1 m returning internally displaced people and 0.2 million asylum-seekers.

Demographic data is available for 78 per cent of these displaced and stateless people in Asia-Pacific, with a significant contribution resulting from the collaboration between UNHCR and academia using statistical modelling to estimate the sex and age-distribution of Afghan refugees in Iran. Among the displaced and stateless populations just over half are children, almost double the proportion of children in the region.

This Stats Café aims to present the following:

- Forced displacement trends in the region by UNHCR Regional Bureau
- Update on Expert Group on Refugee, IDP and Statelessness Statistics (EGRISS) and International Recommendations on Statelessness Statistics (IROSS)
- Pakistan CCAR/NADRA registration figures
- Iran demographic modelling by University of Southampton

To join the session **To register**

Welcome remarks
RACHAEL BEAVEN
Director, Statistics Division
ESCAP

CHAO HUANG
Statistics and Data Analysis Officer
Regional Bureau for Asia and the Pacific, UNHCR

NATALIA KRYNSKY BAAL
Head of the Secretariat, The Expert Group on Refugee, IDP and Statelessness Statistics (EGRISS)

ASHAR AHMAD
Identity Management Specialist
National Database & Registration Authority, Pakistan
