

Poverty and Inequality Reducing Programs: Lessons from the Philippines

Celia M. Reyes
Senior Research Fellow, PIDS

Strategic Dialogue on Poverty and Inequality in Asia and the Pacific
UN ESCAP Bangkok, October 5-6, 2017

Poverty and Inequality Reducing Programs

1. 4Ps Conditional Cash Transfer to reduce inequalities in opportunities in education and reduce intergenerational poverty
2. Community Based Monitoring System (CBMS) as a tool to reduce poverty and inequality at the local level

The Philippines' Conditional Cash Transfer Program: Pantawid Pamilyang Pilipino Program (4Ps)

Program Description

- To promote investment in human capital that ensures children belonging to poor households, aged 0-18, grow up healthy and stay in school
- Utilizes the conditional cash transfer scheme wherein beneficiaries receive cash grants based on their compliance to their co-responsibilities

Annual budget of 4Ps Program, in million PhP, 2008-2017

Budget category/Year	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017

Eligibility

- Household is “poor” based on the Listahanan (formerly known as the National Household Targeting System for Poverty Reduction)
- Must have children aged 0-18 or have a pregnant member at the time of the enumeration. The program expanded the age coverage of eligible children beneficiaries from 0-14 to 0-18 years old to ensure that school-aged children will be given financial assistance until they reach 18 years old or finish high school, whichever comes first.
- Must be willing and able to comply with the conditionalities of the program as part of their co-responsibilities.

Program Features/Design

- Health Grant: P500 per month
- Education Grant
 - Elementary - P300 per month for 10 months
 - High School – P500 per month for 10 months
- Maximum of three (3) children per household is covered by the program
- Children beneficiaries are covered until they exceed the age 18 or finish high school, whichever comes first.
- Accordingly, the household will exit from the program when all the children beneficiaries graduate from high school or reach the maximum age of eligibility.

Conditionalities

FOR EDUCATION

- Children 6-18 years old enroll in primary/secondary schools or equivalent Alternative Learning System/Alternative Delivery Method, and have at least 85% school attendance
- Children 3-5 years old attend daycare/preschool program with at least 85% school attendance
- High school students are required to obtain a passing General Weighted Average (GWA) prescribed by the DepEd. High school students must also be promoted to the next grade level in the succeeding school year.

Conditionalities (cont'd.)

FOR HEALTH

- Children 0-5 years old get regular preventive health check-ups, growth monitoring and vaccines
- Pregnant women get pre-natal care and attended by skilled/professional health worker during child birth.
- Mothers who have given birth get post-natal care in accordance with the standard DOH protocol
- Children 6-14 years old must receive deworming pills twice a year

Conditionalities (cont'd.)

FOR FAMILY DEVELOPMENT SESSION

- Eligible households will have to attend the Community Assembly (ComAss) for their actual registration for the program. Households are required to submit documentary requirements such as marriage certificate and birth certificates of the children

Number of Beneficiary Households in millions

Source data: DSWD

 Philippine Institute for Development Studies
Surian sa mga Pag-aaral Pangkaunlaran ng Pilipinas

Findings: Impact Evaluations 1 & 2

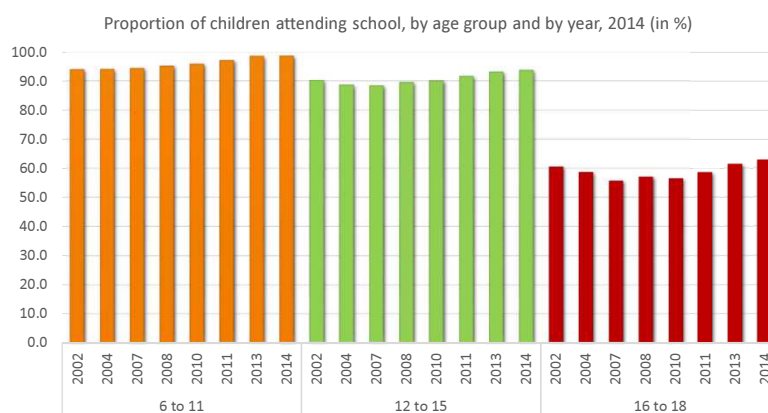

- Increased school enrolment, school attendance, and access to key maternal and child health care services.
- The program keeps children in school. The program also increases households' investment in education.
- It keeps poor children healthy; reduced severe stunting.
- Reduced hours of child labor among poor children.

 Philippine Institute for Development Studies
Surian sa mga Pag-aaral Pangkaunlaran ng Pilipinas

Findings: Impact Evaluations 1 & 2

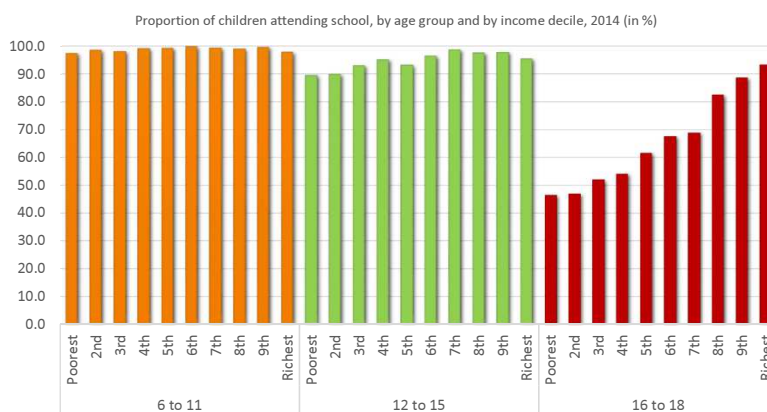

- The program also encouraged poor mothers to avail maternal health care services and the poor children to take up Vitamin A, deworming pills, and regular weight monitoring.
- More Pantawid mothers delivered in health facilities and accessed postnatal care services by skilled health professionals.
- The program has not affected decisions to work and fertility rates.

Proportion of children attending school has been increasing over time

Source of basic data: Philippine Statistics Authority, Annual Poverty Income Survey

Proportion of children attending school increases with income

Source of basic data: Philippine Statistics Authority, Annual Poverty Income Survey

More than half of those who have been in the program for at least 5 years are still poor

Magnitude of poor families and Poverty incidence by year of entry in 4Ps

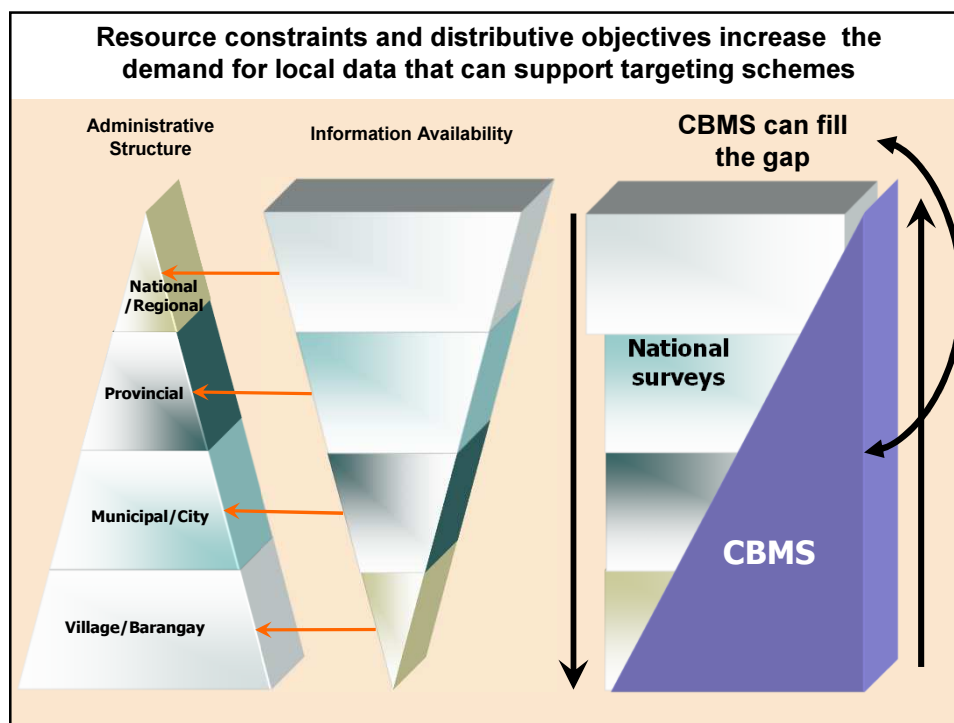

Year of entry	Magnitude of poor families who are 4Ps beneficiaries	Poverty incidence (%)
2009	504,949	60.8
2010	318,491	51.4
2011	520,226	51.9
2012	287,000	42.3
2013	167,206	38.9
2014	100,614	37.3
2015	46,404	41.4
Total	1,944,890	49.3

Lessons

- Moving people out of poverty requires a package of interventions
- Results suggest reduction in poverty but it is too early to say if it reduces intergenerational poverty.
- Outstanding issue is the exit or graduation policy.
- Requires a significant amount of resources to sustain the program, for both direct program costs as well as administrative costs of targeted programs

Community Based Monitoring System (CBMS)

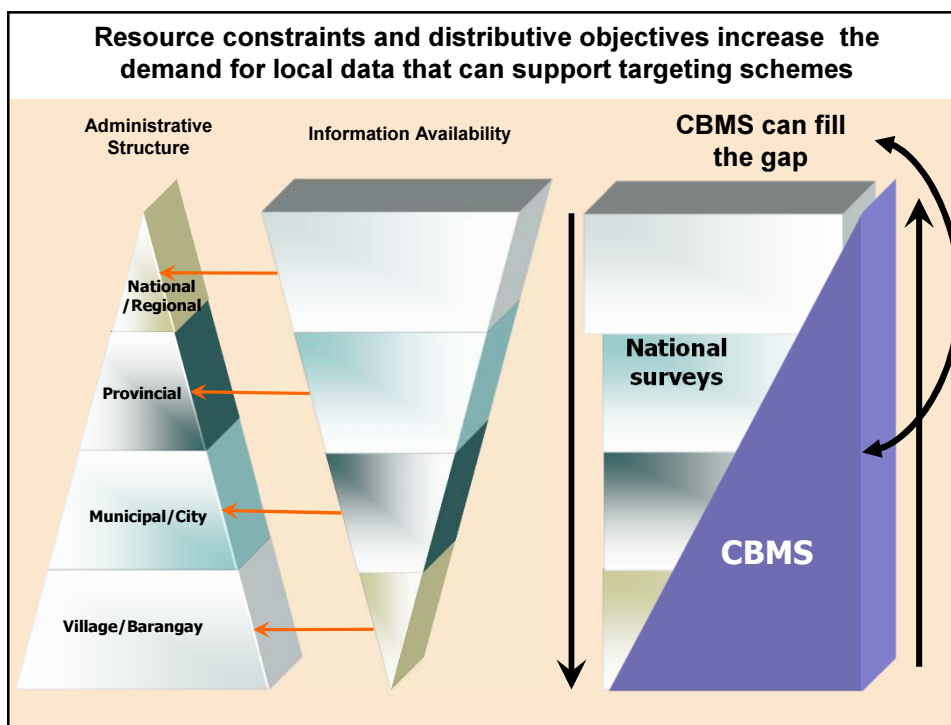

Localizing the SDGs

- “Leaving no one behind” requires data on the different dimensions of poverty for the same household at the same time

KEY FEATURES OF CBMS

- It is an organized way of collecting household and individual level data with the following features:
 - Designed primarily to provide inputs for local level planning and budgeting; lodged at the planning units of local government units
 - Census of all households in the community
 - Uses mobile-based technology to collect data and GIS to present spatial disparities
 - Conducted periodically
 - Provides data on the different dimensions of poverty, including the multidimensional poverty index (MPI)
 - Can provide data for 32 out of the 232 SDG indicators, including the desired disaggregations (“Leaving no one behind”)
- CBMS aims to
 - Promote transparency and accountability
 - Support rational allocation of resources
 - Empower the community

CBMS Responds to:

- **Lack of necessary disaggregated data** for:
 - ✓ **Diagnosing** extent of poverty at the local level
 - ✓ **Determining** the causes of poverty
 - ✓ **Formulating** appropriate policies and program
 - ✓ **Identifying** eligible beneficiaries
 - ✓ **Assessing** impact of policies and programs
- **Need for support mechanisms** for the implementation of the decentralization policy
 - *CBMS facilitates greater transparency and accountability in local governance*

Targeting of Interventions

- CBMS can identify who and where the poor are and what are their needs
- CBMS directs assistance to those who need it most

CBMS Core Indicators of Poverty

Dimension	Indicator	
Health and Nutrition	Proportion of children under 5 who died	Health poor
	Proportion of women who died due to pregnancy related causes	
	Proportion of children aged 0-5 who are malnourished	Nutrition poor
Housing	Proportion of households in makeshift housing	Housing poor
	Proportion of households who are informal settlers	Tenure poor
Water and Sanitation	Proportion of households without access to safe water supply	Water poor
	Proportion of households without access to sanitary toilet facilities	Toilet poor

CBMS Core Indicators of Poverty

Dimension	Indicator	
Education	Proportion of children 5 years old who are not attending kindergarten	Education poor
	Proportion of children 6-11 years old who are not attending elementary school	
	Proportion of children 12-15 years old who are not attending secondary (junior high) school	
	Proportion of children 16-17 years old who are not attending senior high school	
	Proportion of children 6-15 (5-17) years old who are not attending school	

CBMS Core Indicators of Poverty

Dimension	Indicator	
Income and Hunger	Proportion of households with income below the poverty threshold	Income poor
	Proportion of households with income below the food threshold	Income poor (extreme)
	Proportion of households who experienced hunger due to food shortage	
Employment	Proportion of persons in the labor force who are unemployed	Job Poor
Peace and Order	Proportion of persons who are victims of crime	Security Poor

CBMS and the SDGs

- SDGs focus on disaggregation by sex, age, geographic area, ethnic groups, etc.
- CBMS collects data on each and every member of the household, covers all the households and collects data on the different dimensions of poverty.
- Thus, CBMS data can be used to estimate some of the SDG indicators, including Multidimensional Poverty Index (MPI), and the desired disaggregation for these indicators.

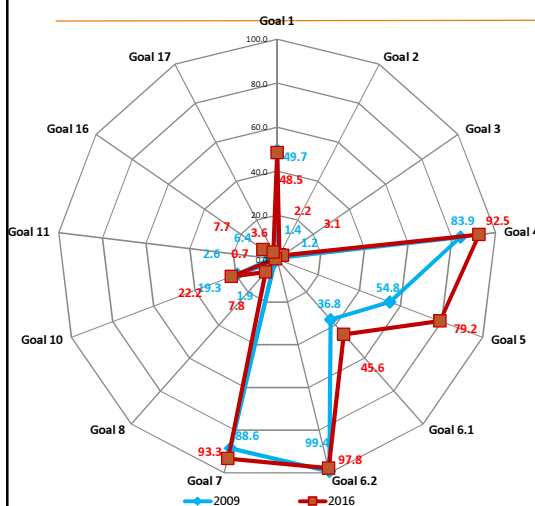

CBMS and the SDGs

32 SDG indicators can be generated using the CBMS data

MONITORING THE SDGs USING CBMS DATA

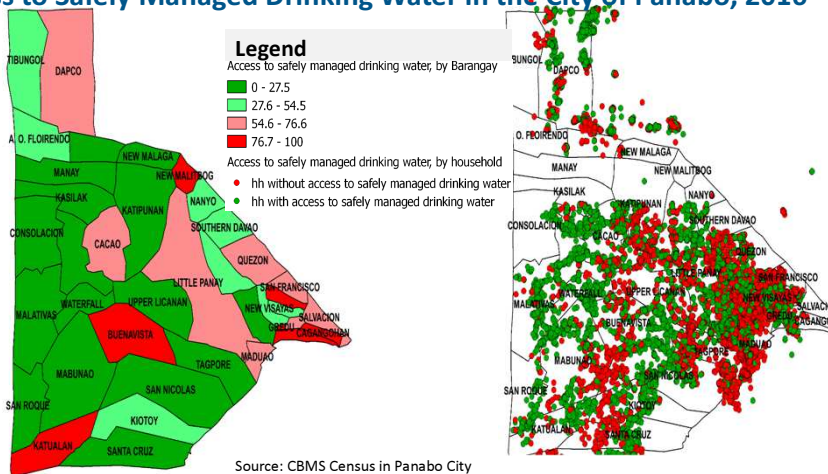

Source: CBMS Census in the City of Panabo, 2009 and 2016

Goal	Indicator	2009	2016
Goal 1	1.1.1 Proportion of population below the international poverty line, by sex, age, employment status and geographical location (urban/rural); using 1.25 USD/day	49.7	48.5
Goal 2	2.2.2 Prevalence of malnutrition (weight for height >+2 or <-2 standard deviation from the median of the WHO Child Growth Standards) among children under 5 years of age, by type (wasting and overweight)	1.4	2.2
Goal 3	3.2.1 Under-five mortality rate, per 1000	1.2	3.1
Goal 4	4.1.1 (a) Net enrolment rate in primary education	83.9	92.5
Goal 5	5.b.1 Proportion of individuals who own a mobile telephone, by sex (proxy: Proportion of households with at least one member who owns a mobile telephone)	54.8	79.2
Goal 6.1	6.1.1 Proportion of population using safely managed drinking water services	36.8	45.6
Goal 6.2	6.2.1 Proportion of population using safely managed sanitation services, including a hand-washing facility with soap and water	99.4	97.8
Goal 7	7.1.1 Proportion of population with access to electricity	88.6	93.3
Goal 8	8.5.2 Unemployment rate, by sex, age and persons with disabilities	1.9	7.8
Goal 10	10.2.1 Proportion of people living below 50 per cent of median income, by age, sex and persons with disabilities	19.3	22.2
Goal 11	11.1.1 Proportion of urban population living in slums, informal settlements or inadequate housing	2.6	0.7
Goal 16	16.1.1 Number of victims of intentional homicide per 100,000 population by sex and by age	6.4	7.7
Goal 17	17.8.1 Proportion of individuals using the Internet	-	3.6
