

Statement by Mr. M. Ari Nugraha
On behalf of
Delegation of the Republic of Indonesia

the Fifth Session of Committee on Statistics
Agenda Others
Bangkok, 15 December 2016

Excellencies,

Thanks to the honourable Mr Chair,

Distinguished Delegates,

Firstly, representing BPS-Statistics Indonesia we the Indonesian Delegates ready to support the new responsible after Mr. Suharyanto elected as the Chair of this the Fifth Session of the Committee on Statistics.

Secondly, in this opportunity, Indonesia Delegate would like to express a deep appreciation and thankfulness for the effective work of UN-ESCAP and its invaluable contribution to the advancement of statistics in the Asia Pacific region.

We would like to inform the process of conducting to build indicator of SDG, such as

President Directives within Cabinet Meeting, December 2015:

1. Optimise the coordination role of Bappenas in development as most of the SDGs indicators are integrated into the National Medium Term Development Plan (RPJMN) 2015-2019
2. Involve all stakeholders (government, members of parlement, civil society organization, philanthropy and business, researchers and academicians) to synergise for SDGs, accordingly.

New surveys have been developed to enrich information needed for constructing SDGs indicators:

- Anti-Corruption Behavior – GOAL 16
- Social Capital – GOAL 16
- Indonesia Democracy Index – GOAL 16
- Happiness Index – GOAL 16
- Violence against woman and children – GOAL 5
- Victimization Survey – GOAL 5
- Household Behavior to Environmental Changes – GOAL 8

The latest new survey conducted was Survey on Quality of Water, the result of coordination with the Ministry of Health and UNICEF. The results in portraying the quality of water in one district is good for analysis, however, because of the unavailability of laboratory to check the quality of

water, the same survey cannot be conducted in many districts. This is the example and challenge that have to be solve for other indicators in Indonesia.
