

National Policy Indicator System

2006. 10

KNSO

Why did this system come into being?

Issued by President of Republic of Korea

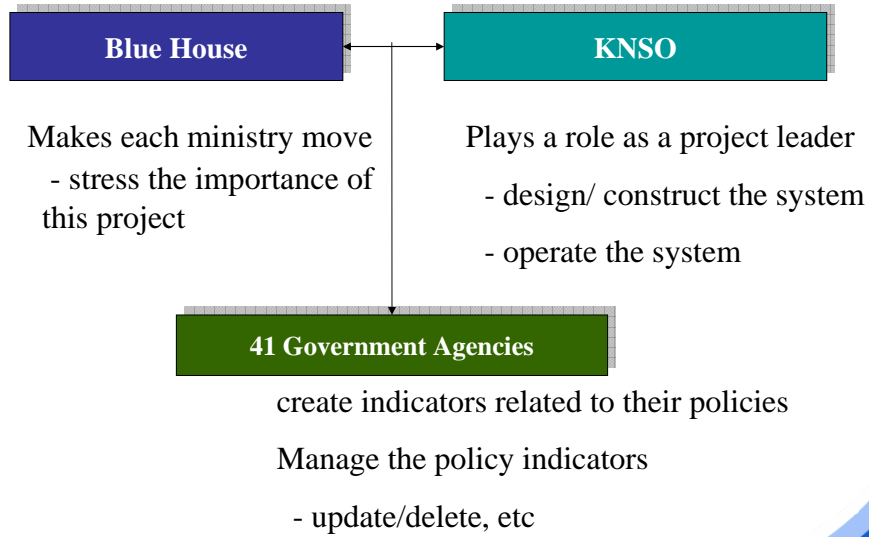

1 wants to evaluate the success and failure of national policies based on objective figures and statistics

2 National infrastructure is required which will provide an objective direction that our nation should go toward.

3 open a way for people to have access to the information and participate in the policy making process

Who involved this project?

What does this system contain?

806 National Indicators

Category	# of Indicators	examples
