

## Contents

Foreword	iii
Acknowledgments	iv
Executive Summary	v
Explanatory notes	xiv
Acronyms and Abbreviations	xvi
<b>Chapter 1:</b> The shifting contours of the Asia-Pacific disaster riskscape	1
<b>Chapter 2:</b> Managing disasters during a global pandemic	24
<b>Chapter 3:</b> Hotspots of exposure to cascading risks	44
<b>Chapter 4:</b> The scaled-up contours of a regional resilience response	67

## Figures

Figure 1-1	Number of fatalities and people affected in the Asia-Pacific region and the rest of the world, 1970–2020	2
Figure 1-2	Number of fatalities and people affected in the Asia-Pacific region, 1970–2020	3
Figure 1-3	Number of fatalities and people affected in ESCAP subregions, 2011–2020	4
Figure 1-4	Average annual damage as a percentage of GDP, 1980–2018	4
Figure 1-5	Wind speeds of tropical cyclones in the Western North Pacific, 1978–2018	5
Figure 1-6	Number of fatalities and people affected by tropical cyclones in Asia and the Pacific, 1991–2020	5
Figure 1-7	Number of consecutive dry days – projected change RCP 8.5, 2040–2059	6
Figure 1-8	Number of fatalities and people affected by floods, 1991–2020	7
Figure 1-9	Maximum five-day cumulative precipitation amount projected to return in a ten-year period, RCP 8.5, 2040–2059	8
Figure 1-10	Projected change in number of days with temperature over 25°C, RCP 8.5, 2040–2059	8
Figure 1-11	Confirmed dengue cases, 1990–2018	9
Figure 1-12	Confirmed malaria cases, 2000–2017	10
Figure 1-13	Monthly COVID-19 cases in Asia and the Pacific, 1 January 2020—6 June 2021	11
Figure 1-14	COVID-19 and major disasters in 2020 and 2021	12
Figure 1-15	Convergence of cyclone Amphan with the COVID-19 pandemic	13
Figure 1-16	Number of people in Asia and the Pacific affected by biological and other natural hazards, 2003–2020	15
Figure 1-17	Types of disasters in Asia and the Pacific, 2000–2020	15
Figure 1-18	Climate change exacerbates disaster risk	18
Figure 1-19	Impact of climate change on extreme weather conditions	19
Figure 1-20	Impacts of climate change on natural and other biological hazards	21
Figure 2-1	The Dharavi “chase the virus” model	26
Figure 2-2	Mapping the potential risk of COVID-19 spread in Jakarta, Indonesia	27
Figure 2-3	New Zealand – modelling the impact of lockdown	28

Figure 2-4	Population affected simultaneously by floods and COVID-19, in South Asia (June to July 2020)	29
Figure 2-5	More heatwaves but fewer deaths in Indian states, 2015–2020	30
Figure 2-6	Australia seven-day bushfires forecast on 15 January 2020	31
Figure 2-7	Populations exposed to sand and dust storms in East and North-East Asia, 15–18 March 2021	32
Figure 2-8	Locust swarms forming in spring 2020	33
Figure 2-9	Asia-Pacific countries vulnerable to climate hazards and social protection	34
Figure 2-10	A model of multi-hazard cascading risk and social vulnerabilities	35
Figure 2-11	Those most impacted by multi-hazard cascading risk	36
Figure 2-12	Populations with lower levels of human development at risk from cascading risks	36
Figure 2-13	Projected child malnutrition under the worst-case climate change scenario, selected countries	38
Figure 2-14	Proportion of women with limited access to health care under the worst-case climate change scenario, selected countries	39
Figure 2-15	A subregional analysis of disability prevalence and losses from multi-hazard cascading risks	40
Figure 2-16	Percentage of elderly population at risk from natural hazards under worst-case scenario	41
Figure 2-17	Displacement in Asia and the Pacific from natural hazards and other risks, 2015-2019	xii
Figure 3-1	Population exposure to heatwaves and related diseases under current and worst-case (RCP 8.5) scenarios in East and North-East Asia	46
Figure 3-2	Population exposure to heatwaves and related diseases, 2020–2059	47
Figure 3-3	Population exposure to drought and related diseases under current and worst-case (RCP 8.5) scenarios in North and Central Asia	48
Figure 3-4	Increase in population exposure to droughts and related diseases under current and worst-case (RCP 8.5) scenarios in North and Central Asia	49
Figure 3-5	Population exposure to floods and related diseases under current and worst-case (RCP 8.5) scenarios in South and South-West Asia	51
Figure 3-6	Population exposure to cyclones and related diseases under current and worst-case (RCP 8.5) scenarios in South and South-West Asia	52
Figure 3-7	Population exposure to floods and related diseases, millions, 2020–2059	53
Figure 3-8	Population exposure to drought and related diseases under current and worst-case (RCP 8.5) scenarios in South-East Asia	54
Figure 3-9	Increase in population exposure to drought and related diseases under current and worst-case (RCP 8.5) scenarios in South-East Asia	55
Figure 3-10	Multi-hazard risks from climate-related disasters and diseases under current and worst-case (RCP 8.5) scenarios in the Pacific small island developing States	56
Figure 3-11	Average population exposure to multiple hazards under moderate and worst-case climate change scenarios, percentage	57
Figure 3-12	Increase in Average Annual Losses (AAL) from cascading risks under current, moderate (RCP 4.5), and worst-case (RCP 8.5) climate change scenarios, US\$ millions	58
Figure 3-13	Increase in Average Annual Losses (AAL) as a percentage of GDP under current, moderate (RCP 4.5), and worst-case (RCP 8.5) climate change scenarios	58
Figure 3-14	Annual Average Losses (AAL) from cascading hazards as a percentage of subregional GDP	59
Figure 3-15	Hospitals serving vulnerable people at risk from natural, biological and other health hazards under the worst-case (RCP 8.5) climate change scenario	60
Figure 3-16	Percentage of hospitals serving poor people at risk from natural, biological and other health hazards under the worst-case (RCP 8.5) climate change scenario	61
Figure 3-17	Electricity infrastructure exposed to multi-hazards under the worst-case (RCP 8.5) climate change scenario	62
Figure 3-18	Proportion of electrical grid and hydropower capacity at risk from multi-hazards under the worst-case (RCP 8.5) climate change scenario	62
Figure 4-1	Six characteristics of systemic risk	68
Figure 4-2	National adaptation strategies that include the health sector, by subregion	70

Figure 4-3	Priorities for the health sector identified by countries in national adaptation strategies, by subregion	70
Figure 4-4	Planning scenarios for the intersection of converging hazards and cascading risks	72
Figure 4-5	Vulnerable populations in Bangladesh	73
Figure 4-6	India's Digital Health Framework	75
Figure 4-7	Adaptation cost estimates by United Nations Framework Convention on Climate Change and the Intergovernmental Panel on Climate Change	77
Figure 4-8	Subregional adaptation costs for climate-related hazards and biological hazards, percentage of GDP	79
Figure 4-9	Adaptation costs under RCP 8.5 for countries in the Pacific, as a percentage of GDP	80
Figure 4-10	Adaptation costs under RCP 8.5 for the Least Developed Countries, percentage of GDP	80
Figure 4-11	Adaptation priorities for ESCAP subregions	84

## Tables

Table 1-1	Dengue outbreaks in 2019	10
Table 1-2	Number of people affected by the COVID-19 pandemic and natural hazards in the Asia-Pacific subregions	13
Table 2-1	Key actions for shock-responsive social protection programme	35
Table 2-2	Countries with the highest proportions of their poorest population exposed to multi-hazard cascading risk (current and two climate scenarios)	37
Table 3-1	Average Annual Losses (AAL) from the new expanded riskscape under moderate (RCP 4.5) and worst-case (RCP 8.5) climate change scenarios	57
Table 4-1	Cost estimates for climate adaptation, infrastructure resilience and sustainable development	77
Table 4-2	Annual adaptation cost under RCP 8.5 by subregion, billions of US dollars	78
Table 4-3	Estimated adaption costs compared with intended national determined contributions (INDCs)	81
Table 4-4	Adaptation costs and priorities by ESCAP subregions	85

## Boxes

Box 1-1	Cascading hazards	14
Box 1-2	Natural disasters, climate change and the emergence of fungal pathogens	17
Box 3-1	Representative Concentration Pathways (RCPs)	45
Box 3-2	Cyclone Tauktae — a manifestation of the emerging riskscape	50
Box 3-3	Sand and dust storms and human health	63
Box 4-1	The Sendai Framework and the Bangkok Principles	71
Box 4-2	Building back better after the Indian Ocean tsunami	72
Box 4-3	AI-based next generation flood forecasting	74
Box 4-4	The Pacific Disaster Risk Financing and Insurance Program	79
Box 4-5	Forecasting cascading risk scenarios at different time scales	82
Box 4-6	Philippines Natural Disaster Risk Insurance Policy	86
Box 4-7	Adaptation Priorities in the Pacific small island developing States	88
Box 4-8	COVID-19 vaccination in Asia and the Pacific	90
Box 4-9	Critical infrastructure services: key policy innovations for future pandemic	91
Box 4-10	Scenario planning in the coastal city of Visakhapatnam, India	92
Box 4-11	Melbourne Water's Industry Climate Change Committee	93
