

Implementation of the SDG indicator framework

Francesca Perucci

Statistics Division, United Nations Department of Economic and Social Affairs

What is the IAEG-SDGs mandated to do?

- Develop the indicator framework for the monitoring of the goals and targets
- Provide technical support for the implementation
- Encourage good practices and innovations, including in the area of national capacity- building
- Regularly review methodological developments
- Report on progress towards the goals and targets based on global and regional aggregates
- Review capacity-building activities and make recommendations to UNSC, HLG, CCSA
- Review and support work by Secretariat on data-user forum, tools for data analysis and dashboard on the state of sustainable development goals.

The High-level group

Operates under the auspices of the Statistical Commission and will report to it annually

22 Members

Members in the region:

Mongolia

Pakistan

Malaysia

Kazakhstan

Vanuatu

First meeting: 7 October 2015

What are the tasks of the High-level group?

- Provide strategic leadership for the implementation of the SDG statistical monitoring and reporting;
- Promote national ownership and foster capacity-building, partnership and coordination, including to link national and global monitoring;
- Address the need of funding statistical capacity-building;
- Advise on harnessing the opportunities of the data revolution;
- Make recommendations on data infrastructures to exploit the possibilities of new technologies;
- Promote dialogue and partnerships between the statistical community and other stakeholders.

Critical elements of the implementation process

- Need to continue consultations
- Resource mobilization strategy
- Identify capacity gaps/where resources should be channeled first
- Modernization of statistical systems
- Resolve inconsistency: need to produce indicators for global monitoring versus national ownership of the process
- Establish working groups in sub-regions
- Linking global monitoring to national monitoring (metadata)
- Harnessing the data revolution opportunities
- New data sources
- Integration of data sources
- Need for legal framework

THANK YOU
