- 5.6 Reproductive health access & rights
- 5.a Equal economic rights
- 5.b Technology for women empowerment
- 5.c Gender equality policies

## GOAL 6

- 6.b Participatory water & sanitation mgmt.
- 6.1 Safe drinking water
- 6.2 Access to sanitation & hygiene
- 6.6 Water-related ecosystems
- 6.a Int. cooperation on water & sanitation
- 6.3 Water quality
- 6.4 Water-use efficiency
- 6.5 Transboundary water cooperation

## GOAL 7

- 7.1 Access to energy services
- 7.a Int. cooperation on energy
- 7.3 Energy efficiency
- 7.b Investing in energy infrastructure
- 7.2 Share of renewable energy

## GOAL 8

- 8.1 Per capita economic growth
- 8.2 Economic productivity & innovation
- 8.3 Formalization of SMEs
- 8.4 Material resource efficiency
- 8.6 Youth NEET
- 8.10 Access to financial services
- 8.5 Full employment & decent work
- 8.7 Child & forced labour
- 8.8 Labour rights & safe working env.
- 8.9 Sustainable tourism
- 8.a Aid for Trade
- 8.b Strategy for youth employment

## GOAL 9

- 9.4 Sustainable & clean industries
- 9.c Access to ICT & the Internet
- 9.5 Research and development
- 9.b Domestic technology development
- 9.1 Infrastructure development
- 9.2 Sustainable/inclusive industrialization
- 9.3 Small-scale industries access to finance
- 9.a Resilient infrastructure

## GOAL 10

- 10.1 Income growth (bottom 40%)

- 17.15 Respect country's policy space
- 17.16 Global partnership for SD
- 17.17 Partnerships (public, private, CSO)
- 17.18 National statistics availability

■ MAINTAIN progress to achieve target

■ ACCELERATE progress to achieve target

■ REVERSE trend

■ Cannot be measured

Eighty per cent of the measurable SDG targets require accelerating the current pace of change (targets in yellow) or reversing the current trend (targets in red). More than half of the targets on which the region is on track (targets in green) fall under goals 3, 4, 6, and 16. Among the top priority targets are ones related to climate action. Nearly 40% of all SDG Targets with insufficient data (in grey) relate to the environment.

At the indicator level, Asia and the Pacific is on track for nearly one quarter of the SDG Indicators with sufficient data. For 20 per cent of indicators that region is off-track, conditions in 2030 will be worse than they were in 2015 unless immediate actions are taken to reverse current trends. It is clear that some trends in every development pillar in the Asia-Pacific region must be reversed.

### WHERE IS THE ASIA AND THE PACIFIC ON-TRACK?

Despite significant progress on some goals such as quality education (Goal 4), without extra efforts, the region is likely to miss all 17 goals by 2030. In particular, the region needs to reverse trends on responsible consumption and production (Goal 12) and climate action (Goal 13) where the region is going backwards.

In 2017, only 25 per cent of the SDG indicators had sufficient data for progress assessment. Data availability has steadily increased, reaching 42 per cent of SDG indicators in 2019. Nevertheless, the number of indicators without any data – currently 71 out of 232 – indicates the statistical community still has challenges to overcome and further investment is required.

Most progress has been made on goals that have higher data availability when compared to goals where progress has been limited.
