Report on the Technical Working Group on Disaster-related Statistics in Asia and the Pacific

Mr. President/Chair,

- Thailand welcomes the report and appreciates the work of the technical working group on disaster-related statistics in Asia and the Pacific, in particular, the working group’s efforts in expand the production, dissemination and use of a basic range of disaster related statistics by countries.
- In Thailand, the disasters have occurred more frequently and have become more complex, causing tremendous losses of lives and properties by Global warming effects, advance of technology and industry development together with rapid expanded community. The Royal Thai Government have recognized to upgrade livelihood and property safety under the National Disaster Prevention and Mitigation Plan 2021-2027 which rely on Sendai Framework for Disaster Risk Reduction.
- Thai NSO has been working with Department of Disaster Prevention and Mitigation to contribution of data and official statistics to support the indicators for monitoring and evaluating the plan, for example, to improve questionnaire for data collection from local agencies to central agency concordance with standards and recommendations of the Disaster-related Statistics Framework, and to calculate “direct disaster economic loss in relation to global GDP
- In looking forward, we welcome to work with Technical Working Group on Disaster-related Statistics for the five-year strategic work plan in advancing the implementation, especially the national implementation of norms and standards for disaster-related statistics and exchanging knowledge between countries and institutions on the compilation of disaster-related indicators.
- Thank you.
