Building blocks for Tracking National SDG Progress

Indicator Identification & Selection

Methodology & progress analysis

National Data Flows
(Coordination, Collection, Validation)

Dissemination and communication of Results

Identifying National priorities
• Review global indicators
• Identify what applies to our country
• Supplement global indicators with national proxies

- Indicator Identification & Selection
- Methodology & progress analysis
- National Data Flows (Coordination, Collection, Validation)
- Dissemination and communication of Results
- Identifying National priorities
• Set nationally relevant target values for 2030 for each indicator

- Indicator Identification & Selection
- Methodology & progress analysis
- Dissemination and communication of Results
- National Data Flows (Coordination, Collection, Validation)
- Identifying National priorities
• Establish an effective mechanism to share and assure quality of data on national SDG indicators to be used for assessing progress.
• Apply statistically sound methods for progress assessment

• The choice of methods should be appropriate for the purpose of progress assessment

- Indicator Identification & Selection
- Methodology & progress analysis
- National Data Flows (Coordination, Collection, Validation)
- Dissemination and communication of Results
- Identifying National priorities
- Target setting
• Make SDG data and the progress assessment results available to decision-makers and the public.

• Distinguish data dissemination and analysis versus results interpretation and communication.
Use SDG progress results to investigate goals, targets or areas that the country needs to prioritize for urgent actions.
