FIRST AND LAST MILE ACCESS TO PUBLIC TRANSPORT: SRI LANKA SITUATION
Current situation

• Out of total 8.35 million of vehicle registrations on average 5.6 million vehicles are in operation.
• There are 4,849,297 motor cycles, 1,184,405 motor tricycles (three-wheelers), and 903,245 motor cars registered in Sri Lanka at the end of the third quarter of 2023.
• Around 300,000 3wheelers and 50,000 cars operate as Taxies in Sri Lanka, providing last mile connectivity.
Arrival of Rider Hail Apps
Problems and Opportunities

• Commuters can call a cab from where they want with relative assurance of safety.

• With pre agreed trip charges, both rider and the taxi driver are assured of their respective charge.

• Rider hailing industry is not streamlined and driven by the market competition.

• Requirements of taxi driver training and filtering need to be agreed upon.

• With proper guidance, safe, inclusive and economic means of last mile connectivity cab be provided with smart technology.
Initiative for Electric Mobility

Matching Characteristics of Electric mobility with needs of the last mile connectivity service providers.

Need for Charging Infra & Technical support
