Economic and Social Commission for Asia and the Pacific Committee on Statistics

Ninth session Bangkok, 11–13 December 2024

Item 2 of the provisional agenda*

Harnessing the power of data to leave no one behind
• Mongolia acknowledges the three proposed recommendations. Furthermore, we have challenges in improving the skills and capabilities of data specialists in statistics and public organizations. Therefore, we believe that by developing strategic visions for data that recognize the power of data, we can address and prioritize these concerns with the support of a national partnership of data stakeholders. • Mongolia endorses the two proposed decisions, including a whole-of-society approach to advance the implementation of the Declaration on Navigating Policy with Data to Leave No One Behind. Furthermore, we strongly support the national data partnership development, and establishment of national data user advisory groups, and strategic visions for data.
