Agenda 4a*:* Progress made in implementing the decisions taken by the Committee at its eighth session

Thank you for the comprehensive presentation on the progress made in implementing the resolutions from the 8th session of the Committee on Statistics and the activities carried out to date.

Thailand supports the decision to discontinue overlapping working groups in their previous formats and transitioning towards more flexible teams. This approach will strengthen regional collaboration and enhance the ability of countries to respond swiftly and effectively to emerging needs and developments.

Moreover, Thailand supports the implementation of resolutions aimed at advancing data governance frameworks and the enhancement of cooperation in environmental statistics, particularly on the issue of climate change statistics, which is critical for driving sustainable development and addressing shared regional challenges.

We appreciate the Committee's efficient work and accomplishments over the past year, and Thailand stands ready to collaborate and actively contribute to the development of the 2025–2026 Strategic Plan to ensure that we are well-prepared to meet future challenges and seize opportunities for advancing regional statistical systems.
