Commission économique et sociale pour l’Asie et le Pacifique

Soixante-huitième session
Bangkok, 17-23 mai 2012
Point 3 a) de l’ordre du jour provisoire
Examen des questions relatives à l’appareil subsidiaire
de la Commission, y compris les activités des institutions
régionales de la CESAP: Politiques macroéconomiques,
réduction de la pauvreté et développement inclusif

Lettre en date du 14 mai 2012, adressée à la Secrétaire de la
Commission par le Président du Comité national pour la
CESAP du Cambodge

Au nom du Gouvernement royal du Cambodge, le Comité national pour la
CESAP présente ses compliments au secrétariat de la Commission économique et
sociale pour l’Asie et le Pacifique et, se référant à la Réunion régionale Asie-
Pacifique sur la mise en œuvre du Programme d'action d’Istanbul en faveur des
pays les moins avancés pour la décennie 2011-2020, qui a été organisée
conjointement par la Commission économique et sociale pour l’Asie et le
Pacifique (CESAP) et le Bureau du Haut-Représentant des Nations Unies pour
les pays les moins avancés, les pays en développement sans littoral et les petits
États insulaires en développement et qui s’est tenue à Bangkok du 14 au 16
décembre 2011, a l’honneur de transmettre au secrétariat le texte de la Feuille de
route régionale pour la mise en œuvre du Programme d'action d’Istanbul dans la

Le Gouvernement royal du Cambodge a l’honneur de demander que la
Feuille de route soit portée à l’attention de la Commission à sa soixante-huitième
session, au titre de l’alinéa a) du point 3 de l’ordre du jour provisoire.
(Signé).

Ly Thuch
Ministre d’État
Président du Comité national pour la CESAP
Vice-Président du Comité national pour la gestion des catastrophes
Gouvernement royal du Cambodge
Annexe à la lettre en date du 14 mai 2012, adressée à la Secrétaire de la Commission par le Président du Comité national pour la CESAP du Cambodge

Regional Road Map for implementing the Istanbul Programme of Action in Asia and the Pacific region for the Decade 2011-2020

Executive Summary

The Regional Road Map for implementing the Istanbul Programme of Action (IPoA) for the Asia-Pacific LDCs, was adopted by the ESCAP/OHRLLS Asia-Pacific Regional Meeting on the Implementation of the Istanbul Programme of Action (IPoA) for the Decade 2011-2020, held from 14 to 16 December 2011 in Bangkok. It contains a set of capacity development activities aimed at delivering knowledge products, dissemination and advocacy, expert services, and reviews, monitoring and evaluation, and provides a basis for formulating technical assistance programmes and projects at regional, sub-regional and national levels. It identifies the key agencies and entities which would be involved in delivering these products and services at national, sub-regional and regional levels.

* This Regional Road Map has been issued without formal editing.
I. Introduction

Senior policy makers and other participants from the Asia-Pacific LDCs and their development partners, attending the ESCAP/OHRLLS Asia-Pacific Regional Meeting on the Implementation of the Istanbul Programme of Action (IPoA) for the Decade 2011-2020 from 14 to 16 December 2011 in Bangkok, Thailand, adopted the Regional Road Map for implementing the Istanbul Programme of Action (IPoA) for the Asia-Pacific LDCs. Organized soon after the UN LDC IV Conference, held in May 2011 in Istanbul, the ESCAP/OHRLLS Asia-Pacific Regional Meeting was the first of its kind in initiating the implementation process of the Istanbul Programme of Action for the Decade 2011-2020 in Asia and the Pacific region.

The main objective of the Regional Road Map for implementing the Istanbul Programme of Action (IPoA) provides a framework for action, both at the national level and in the form of regional partnership that would add value to national development strategies and processes in the Asia-Pacific LDCs. This road map indicates the course of action for coordinating the activities of the relevant regional organizations and agencies to act together with the Asia-Pacific LDCs to sharpen country-level efforts. It is expected that each LDC, given its specific circumstances, will have its own development strategies, plans and programmes. The Regional Road Map is only indicative and aimed at facilitating the implementation of the IPoA. It no way precludes the initiatives and actions the LDCs and their development partners individually or collectively may wish to adopt and pursue.

The Regional Road Map has two broad components: (i) a regional and subregional implementation strategy for the Asia-Pacific LDCs; and (ii) a set of deliverables for implementing IPoA in the Asia-Pacific region. The first component covers the strategic thrusts in each of the eight priority areas as identified in the IPoA. The deliverables for implementing the IPoA, on the other hand, includes several categories of products and services to be delivered by UN organizations, funds and programmes, including the multilateral funding institutions, either in partnership or individually, in both cases working with the LDCs. These deliverables are: (i) analytical and normative studies and reports on regional awareness creation and consensus building on issues critical to the LDCs and their development partners; (ii) dissemination and advocacy; (iii) mobilizing resources and provision of expert services; (iv) follow up, monitoring and review; (v) mainstreaming IPoA in development cooperation including in the national development strategies of the LDCs; and (vi) identifying substantive measures to enhance contribution of international organizations. These products and services correspond to the priority concerns for implementing the IPoA.

II. The Istanbul Programme of Action

Under the Istanbul Programme of Action (IPoA), it has been agreed that the national policies of the LDCs and international support measures during the decade 2011-2020 will focus on the following five core objectives:

- Achieve sustained, equitable and inclusive economic growth in LDCs, to at least at the level of 7 percent per annum, by
strengthening their productive capacity in all sectors through structural transformation and overcoming their marginalization through their effective integration into the global economy, including through regional integration;

- Build human capacities by fostering sustained, equitable and inclusive human and social development, gender equality, and the empowerment of women;

- Reduce the vulnerability of LDCs to economic, natural and environmental shocks and disasters, as well as climate change, and enhance their ability to meet these and other challenges through strengthening their resilience;

- Ensure enhanced financial resources and their effective use for LDCs’ development, including through domestic resource mobilization, official development assistance (ODA), external debt relief, foreign direct investment and remittances;

- Enhance good governance at all levels, by strengthening democratic processes, institutions and the rule of law; increasing efficiency, coherence, transparency and participation; protecting and promoting human rights; and reducing corruption, and strengthen least developed country governments’ capacity to play an effective role in their economic and social development.

Both the LDCs and the development partners also agreed to adopt eight fundamental principles which will guide the implementation of the Programme of Action based on a strengthened framework of partnership. These are: (i) country ownership and leadership; (ii) an integrated approach; (iii) genuine partnership; (iv) result orientation; (v) peace and security, development and human rights; (vi) equity; (vii) voice and representation; and (viii) balanced role of the State and market considerations.

The IPoA is based on a renewed and strengthened partnership between the LDCs and the development partners to undertake concrete actions in a number of interrelated areas in order to overcome the shortcomings of the BPoA. It has been agreed that the LDCs, on their part, will integrate the IPoA into their national and sectoral development strategies and plans in order to indicate concrete measures. Development partners, on their part, will implement the IPoA by integrating it into their respective cooperation policy frameworks, programmes, and activities to ensure enhanced, predictable, and targeted support to LDCs, as agreed in the IPoA. A number of supportive measures would also be critical for effective implementation of the IPoA, including (i) assistance of the developing countries in the context of South-South cooperation; (ii) sub-regional and regional cooperation including enhanced sub-regional and regional connectivity and strengthened responses to threats and crises of various kinds; (iii) targeted support from the United Nations system including the Bretton Wood institutions; (iv) engagement of parliaments in design, implementation, and review of IPoA; (v) partnerships with the private sector; (vi) involvement of civil society organizations; (vii) revamping international trade and finance architecture to make these supportive of and responsive to the special needs and priorities of the LDCs; and (viii) contribution of development initiatives at sub-regional, regional, and international levels (such as G-20 Seoul Development
Consensus for Shared Growth and its Multi-Year Action Plan) for the inclusive and sustainable growth of the LDCs.

III. Priority Areas for Action

The IPoA has identified eight priority areas around which actions for the LDCs will be organized during the decade. These are:

- **Productive capacity**: infrastructure; energy; science, technology and innovation; private sector development
- **Agriculture, food security and rural development**
- **Trade**
- **Commodities**
- **Human and social development**: education and training; population and primary health; youth development; shelter; water and sanitation; gender equality, and empowerment of women; social protection
- **Multiple crises and other emerging challenges**: economic shocks; climate change and environmental sustainability; disaster risk reduction
- **Mobilizing financial resources for development and capacity-building**: domestic resource mobilization; ODA; external debt; FDI; remittances
- **Good governance at all levels**

For each of these priority areas and their major constituents, IPoA specifies goals and targets that LDCs may pursue in accordance with their national development policies and strategies. The Plan of Action also charts out broad directions along which joint actions could be directed and individual actions by the LDCs and the development partners could be undertaken in order to achieve the goals and targets. Recognizing the crucial role of efficient follow-up and monitoring mechanisms at the national, regional, and global levels for the successful implementation of the IPoA and ensure accountability of the LDCs and the development partners, a mutually complementary and reinforcing framework has also been suggested covering the three levels.¹

¹ The Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States (OHRLLS) with support from the Inter-agency Consultative Group (IACG) has developed a Road Map for monitoring and evaluating the implementation of the IPoA at the global level. OHRLLS and IACG are also engaged in developing a set of indicators to monitor the goals and targets of the IPoA, the draft of which will be shared shortly.
IV. Regional Road Map for Implementing the IPoA

A. Regional and Sub-regional Implementation Strategy for the Asia-Pacific Region

The IPoA has placed particular importance to national level arrangements for its effective implementation since the Programme has to be owned and led by the LDCs. It is expected that each LDC government would integrate the provisions of the IPoA into its policies and development framework and conduct regular reviews on its implementation within a participatory framework. The development partners would also support objectives and policies on the basis of the IPoA that are integrated into national development and cooperation frameworks.

Growth of private enterprise and attracting new forms of FDI in LDCs has added a new dimension in effective development cooperation. This has significant promise to promote economic growth and reducing poverty and attaining MDGs. Also, attention needs to be paid to the precarious state of global food security, including food price volatility and inflation and its destabilizing impact on LDCs. This calls for bringing about increased international and regional cooperation in promoting a new form of agricultural revolution to meet this challenge. Developed countries should also facilitate transfer of technology to LDCs to stimulate a development pattern that is inclusive and sustainable.

The IPoA accords special priority to regional and sub-regional cooperation. It recognizes that the subregional and regional cooperation can play a critical role in promoting sustained, inclusive and equitable economic growth and sustainable development in least developed countries, including through enhanced subregional and regional connectivity, both physical and institutional, and strengthened responses to threats and crises of various kinds. The importance of advancing and supporting subregional and regional cooperation efforts in favour of least developed countries should be stressed (Para 35).

Additionally, international community must galvanize global action in support of development needs of LDCs, whose progress would bring greater global growth and opportunities for all. Increase in south-south cooperation and south-south trade and investment flows has a positive impact on LDCs development processes. LDCs development partners should commit to further strengthening this partnership, which should be seen as a complement, and not a substitute, to north-south cooperation. In that context, countries, including LDCs development partners, should address bottlenecks in duty-free quota free scheme such as stringent rules of origin, complex procedures and supply side constraints to enable LDCs to have a greater share in global trade. Also, an early conclusion of Doha Development Round would allow meaningful integration of LDCs in the multilateral trading network. LDCs would benefit from creation of a debt sustainability framework to address systemic vulnerabilities and to build resilience in their economies.

The IPoA stresses that the efficient follow-up and monitoring mechanisms at the national, regional and global levels are crucial for the successful implementation of this Programme of Action. The IPoA decides that at the regional level, the relevant United Nations regional commissions and agencies should undertake biennial reviews of the implementation of this Programme of Action in close coordination with the global-level and
country-level follow-up processes and in cooperation with subregional and regional development banks and intergovernmental organizations. The relevant United Nations regional commissions and agencies should continue to ensure that the needs and challenges of the least developed countries are addressed as part of their ongoing work (Para 149).

Proposed Regional/Sub-regional Implementation Strategy

This section provides the regional/sub-regional implementation strategy for the Asia-Pacific region for the eight priority areas of action identified in the IPoA, which is based on the premise that each Asia-Pacific LDC translate policies and programmes in the Istanbul Programme of Action into concrete measures by integrating the IPoA into their national and sectoral development strategies and plans. The Strategy is summarized in Table 1. The proposed regional/subregional partnership will assist the Asia-Pacific LDCs with different products and services such as knowledge and capacity development, resources, expertise, advocacy for the IPoA and regional cooperation in delivering public goods assisting the countries to follow country-specific courses of action. However, it will be vital to have the necessary financial, human and technical resources.
Table 1: Regional/sub-regional Implementation Strategy for the Asia-Pacific LDCs

| **Productive capacity** | -Provide enhanced financial and technical support; support transfer of skills, knowledge and technology; support private sector investment and public-private partnerships; assist landlocked and small-island LDCs to address challenges of remoteness.  
-Provide enhanced financial and technical support; support development of generation and distribution, energy efficiency, renewable energy; facilitate private sector investment; facilitate transfer of appropriate and affordable technology.  
-Provide enhanced financial and technical support; urge WTO members to implement Article 7 of 2001 Doha Ministerial Declaration on Agreement on TRIPs and Public Health; provide concessional start-up financing for LDC firms investing in new technologies.  
-Operationalize paragraph 52 of the IPoA which calls for a "joint action on a priority basis by 2013 domestic technological gap and capacity analysis with the aim of establishing a Technology Bank and Science and Technology and innovation supporting mechanism dedicated to least developed countries".  
- Develop a strategy for technical assistance for LDCs in the Asia-Pacific region in technology transfer through the "International Science, Technology and Innovation Center" to be established by the Government of Turkey,  
- Undertake national Science , Technology and Innovation Policy (STIP) review in interested countries in the Asia-Pacific Region -Provide enhanced financial and technical support and facilitate transfer of technology; with specialized support to women; support initiatives to strengthen institutional and managerial capacities and productivity of SMEs, including those in rural areas, to improve competitiveness and participate effectively in regional and global value chains; provide financial and technical support to LDCs for the purpose of promoting, attracting and facilitating development-oriented foreign direct investment; provide financial and technical support to policy makers and enterprises in LDCs to adopt and practice principles of corporate social responsibility, including those embodied in the global compact. Support to develop and implement specific interventions for rural women and other marginalized groups of women will be provided. | All regional and international organizations including UN system; Asia-Pacific LDCs UNCTAD, ESCAP, UN-OHRLLS and other lead agencies identified in the working Group on Science and Technology ESCAP, OHRLLS and LDCs |

| Foreign direct Investment Remittances | - Set up and strengthen as appropriate initiatives to support investment in LDCs such as insurance, guarantees and preferential financing programmes and private enterprise funds for investment in LDCs; support capacity building aimed at improving abilities to attract FDI; support and implement initiatives aimed at encouraging investment such as export credits, risk management tools, co-financing, venture capital and other lending instruments, business development services, and feasibility studies; strengthen partnership programmes for technology transfer under mutually agreed terms by fostering linkages between foreign and domestic firms.  
- Resist unfair and discriminatory treatment of migrant workers and the imposition of unreasonable restrictions on labour migration; consider developing, where appropriate and in accordance with domestic laws, a system of short-term migration; remove unnecessary restrictions on outward remittances and support lowering of transaction costs; and assist formulation of strategies for productive use of remittances | All regional and international organizations including UN system; Asia-Pacific LDCs |
| Good governance at all levels    | - Support efforts to develop human and institutional capacities for good governance; support strengthening national statistical capacity for effective monitoring of IPoA; promote policy coherence and coordination of international financial, trade and development institutions, processes and mechanisms; establish governance and accountability action plans; support strengthened and effective voice and participation of LDCs in international dialogue and action on development and in decision and rule making and standard and norm setting in all areas affecting their development; ratify/accede UN Convention against Corruption and implement appropriate anti-corruption laws and regulations; support efforts to strengthen institutional capacity and regulatory frameworks for preventing corruption, bribery, money laundering, illegal transfer of funds, and other illegal activities by public and private entities; provide assistance to help prevention and resolution of conflict; strengthen support to conflict-affected LDCs to address country-specific needs and situations; harmonize and align assistance with national priorities of LDCs affected by conflict. Sex disaggregated data and Gender responsive planning and budgets for gender responsive policy formulation.  
- National development plans should incorporate GE-WE as a key pillar. Building capacities to integrate gender equality priorities and targets in national development plans and budgets. | All regional and international organizations including UN system; Asia-Pacific LDCs |
Priority areas | Strategy/Action | Responsibility
---|---|---
-Strengthen focus and attention of development assistance targeting gender equality and the empowerment of women by; -Developing tools and mechanisms that effectively measure the resources allocated to gender equality-- to be used by both multi-lateral development agencies and national governments.

*Priority Country-Specific Actions for Asia-Pacific LDCs*

The Asia-Pacific LDCs vary significantly in terms of their physical environments and socio-economic characteristics. The size of population, for instance, varies from a few thousands in the small island states of the Pacific to more than 150 million in Bangladesh. The nature of their problems also differs widely along with potentials and development options. It is important therefore to highlight country-specific strategies and actions within the framework of IPoA. This is necessary since, despite similarities in the overall status of development, the nature and degree of the constraints facing each country are different and these need country-specific actions. Moreover, although the nature of actions may be similar, their relative priority may be different in view of the country realities. It may be mentioned here that most of the relevant actions are more likely to be covered within the development frameworks of these countries as reflected in their plan/strategy documents but the need would be to re-prioritize, adjust and sharpen the actions in the light of the agreed IPoA commitments.
B. Deliverables under the Regional Road Map for Implementing the IPoA

Within the mutually agreed compact between the LDCs and the development partners, the IPoA contains eight priority areas of action, each having concrete commitments and deliverables. The overarching emphasis is on equity at all levels through empowering the poor and marginalized groups and ensuring sustained, inclusive and equitable growth and sustainable development supported by democracy, social justice, and gender equality.

The key challenge for the Asia-Pacific LDCs is to ensure that concrete actions are in place at national, regional/sub-regional and international levels for realizing the commitments and the deliverables in a comprehensive manner. In this context, designing a road map may facilitate a quick transition of both the Asia-Pacific LDCs and their development partners towards a path of coordinated and effective implementation of the IPoA.

The deliverables under the regional road map, given in Table 2, have been designed to provide an account of the possible institutions/agencies\(^2\) that will have to take the lead to ensure proper implementation of the IPoA in the Asia-Pacific region, relevant objectives with which the actions should be guided, and substantial actions that are required to deliver the expected outcomes. It needs to be acknowledged that the number of institutions/agencies that should collaborate is necessarily large in view of the comprehensive nature of the Istanbul Programme and covers the UN system and other international organizations, intergovernmental and regional organizations, global partnerships, donor agencies, multi-stakeholder engagements, and South-South partnerships.

---

\(^2\) It must be emphasized here that none of the UN Organizations, funds and programmes and the global and regional development financial institutions mentioned in Table 2 have been consulted in framing their respective contribution in implementing the IPoA. This draft and suggested scheme is based on their existing mandates and the support they have been providing to the LDCs. Once the draft regional road map is generally endorsed by the LDCs, it is intended that more formal consultation will be initiated with them.

| Mainstream IPoA into development cooperation strategies of development partners including UN and other international agencies, regional/sub-regional organizations, and specialized agencies | - Encourage development partners to fulfill their commitment of mainstreaming IPoA into their development cooperation strategies with LDCs and support effective implementation of IPoA  
- Strengthen cooperation between OHRLLS and international, regional and sub-regional organizations on implementation of IPoA  
- Engage with regional consultative processes to highlight IPoA in the deliberations and actions | Dec 2011-Dec 2016 | UNESCAP and OHRLLS; Asia-Pacific LDCs         |
| - Develop a strategy for mainstreaming trade into national development policies and strategies including through the Enhanced Integrated Framework (EIF) | - Undertake national case studies in selected LDCs in the Asia-Pacific region;  
- Organize training workshop on capacity building in the areas of trade related policy formulation  
- Organize a dissemination workshop for Asia-Pacific region on UNCTAD's annual Least Developed Countries Report series following publication of such reports  
- Analyze as to where selected countries in the region stand now in relation with meeting the graduation threshold; | 2012-2015      | UNCTAD, ESCAP and EIF core agencies          |
| - Identify countries from the Asia-Pacific region with a potential to meet the graduation criteria by 2020 through systematic tracking of progress and by providing "smooth transition" strategy | - Identify challenges and opportunities for graduation including through vulnerability analysis;  
- Prepare policy recommendations for action at the regional and global levels; | First quarter of 2012-2015/ one or two countries per year | UNCTAD, ESCAP, UN-OHRLLS and DESA   |
| Identify substantive measures to enhance contribution of UN system and other international/regional organizations in implementation of IPoA | - Support the possibility of setting up a Technology Bank for the Asia-Pacific LDCs and develop more effective mechanisms for science, technology and innovation transfer to these countries including through South-South cooperation frameworks  
- Contribute to the development of frameworks for supporting Aid for Investment for Asia-Pacific LDCs including concessional startup finance and investment preference regimes  
- Suggest ways to operationalize country-specific Social Protection Floor for Asia-Pacific LDCs  
- Identify specific actions for substantiating commitments in areas of aid, FDI, remittances, domestic resource mobilization, human and social development for the Asia-Pacific LDCs  
- Work with relevant organizations to substantiate commitments related to agriculture, food security, and rural development; and crisis mitigation and resilience building including support to Asia-Pacific LDCs’ risk mitigation strategies, facilitate their access to required resources from different environment and climate funds, and accelerate establishment of Green Climate Fund  
- Build partnership with relevant organizations to roll out the trade related commitments of IPoA | Dec 2011-Dec 2016 | UNESCAP’s support to OHRLLS and other regional intergovernmental entities |

The deliverables under the road map (Table 2) envisages several broad categories of products and services from the global/regional level for the Asia-Pacific LDCs. It is expected that the regional partners can achieve significant economies of scale in building up knowledge and information. Knowledge generation can take a number of forms including yearly assessments of progress achieved by the Asia-Pacific LDCs in terms of major targets set in the IPoA; issues related to achieving the IPoA goals; creating new knowledge affecting goal outcomes; developing evidence-based policy options; estimating resource requirements; and identifying key areas and sectors for public-private-donor investments. For success in achieving the IPoA goal of graduation, different partners need to play their designated roles. However, in order to avoid the process becoming fragmented, uncoordinated and less effective, there is a need to ensure institutionalized interaction and dialogue among the relevant partners. The relevant organizations including UN-ESCAP have considerable experience in the arena of exchange of information on ‘best practices’ and sharing of knowledge and expertise. Another important partner in advocacy will be the media. For interactions, the aim would be raising public awareness so as to build and sustain public support for the IPoA and create opportunities and space for the emergence of new forms of organization and alliances in support of graduation.

Regional cooperation is also vital for the provision of regional public goods. Those that have a direct impact on the IPoA include cross-border infrastructure projects in transport, energy, water and environment, framework agreements in regional and sub-regional trade and transit infrastructure, as well as modalities for dealing with such cross-border issues as environmental pollution, natural disasters, and communicable diseases which have strong externalities and need to be addressed collectively.

Table 2 also summarizes the deliverables and timelines for implementing the road map. It lists several activities, encompassing a wide variety of activities which needs further concretization based on needs assessment and the consultative process, and intensive inter-agency consultation and discussions. The need will also be to involve all the UN organizations, agencies, funds and programmes and the Asian Development Bank in implementing these activities, either individually or in partnership with others. The UNCTs will be invited to participate in further defining and executing these activities. The above should, however, be treated as a ‘rolling programme’ that needs to be revised in the light of experience, and some of the activities that are on-going may be further developed as part of the implementation process.

C. Monitoring and Follow-Up of IPoA

The success of the road map will depend ultimately on the commitment of the regional organizations and entities in pooling their resources and expertise. To do so effectively they will require specific plans, milestones and timelines, and systems for evaluating the outcome. To ensure effective implementation of the commitments, IPoA underscores the importance of effective monitoring, follow-up and review mechanisms at the national, regional and global levels. Central to these, however, is to adopt a set of indicators that are reliable, comparable across time and countries, and easy to collect and interpret.
Indicators reflecting these features are essential in assessing the degree with which actions taken by the Asia-Pacific LDCs and their development partners match their respective commitments needed for promoting mutual accountability. Such mechanisms also help identify constraints and shortcomings and provide feedback to the LDCs and their development partners, enabling both parties to formulate and implement necessary corrective measures. Besides, these indicators are also needed to gauge the effectiveness of their actions. The indicators also help document whether and to what extent implemented actions are able to make progress in achieving the expected outcomes and targets set in IPoA. The framework that should guide the choice of such indicators is the input-process-output-impact approach, which features three main categories of indicators: input indicators (related to actions), process indicators (related to transformation of inputs), and output/impact indicators (related to results and objectives respectively).

Some of these indicators have already been defined and identified for a number of goals and targets of IPoA as well as the MDGs, particularly for those related to human and social development. However, such indicators for remaining priority areas need to be specified and agreed. A set of the proposed indicators for monitoring progress of implementation of IPoA is being prepared by OHRLLS with support from the IACG. However, a process of continuous review needs to be institutionalized so that these indicators can be used on comprehensive and consistent basis.

D. Summary and Conclusions

The greatest challenge facing the Asia-Pacific LDCs is to promote inclusive and sustainable growth for reducing poverty and improving the quality of life of the people. In these countries, such growth requires measures both to accelerate growth and strengthen social protection along with a focus on agriculture and rural development and enhanced financial inclusiveness. The persistence of low level of per capita incomes in the Asia-Pacific LDCs results in a vicious circle where large infrastructure investments remain economically unviable due to low demand for certain infrastructure services while inadequate infrastructure constrains economic activities in others resulting in, among others, low revenue generation for investment in social sectors to achieve the MDGs.

The Asia-Pacific LDCs successfully weathered the recent global economic crisis for which prudent and timely national policies emphasizing short term responses to the external shocks played an important role. For sustaining the growth momentum, these countries need to find new sources of growth to deepen their dynamism mainly through rebalancing their economies in favour of greater domestic and regional consumption. More specifically, the LDCs need to focus on several major imbalances that characterize the process of their economic growth.
