Assessment of the eighth session of the Committee on Disaster Risk Reduction
Bangkok, 25-27 July, 2023

Attended By

Survey Respondents

Key Findings

- The survey indicates a positive perception of the meeting, with an average score of 4.01 across various aspects of the meeting.
- Highest scores were observed for the reflection of current trends/issues, enhancement of knowledge on early warning systems, promotion of regional cooperation, and timely organization of the meeting.

Result Achieved

- Transformative adaptation measures.
- Enhanced cooperation among member states and partners.

Knowledge Sharing:

- Insights, knowledge, and information on DRR strategies.
- Risk management and Early Warning for All initiative.

Collaborative Efforts:

- Highlighting the importance of regional collaboration.
- Achieving Early Warning for All by 2027.

Implementation Practices:

- Sharing practices and challenges in DRR-CCA strategies.
- Discussions on collaborations and alignment with international agreements.

Capacity Building:

- Enhance capacity building and cooperation among ASEAN Members and lower Mekong River countries, and provide more capacity building trainings.
- Collaboration efforts:Highlighting the importance of regional collaboration and discussions, as well as alignment with international agreements.

Suggestions

- Virtual Participation: If possible, make consideration for the time difference for virtual participants and more technical support may be helpful.
- Documents and accessibility: All relevant documents are easier to find for all stakeholders before the meeting. This would increase efficiency of the meetings.
- Guidance and instructions: More guidance on specific targets to be achieved and instructions to relevant organizations and panelists would be helpful.
- Discussion and integration: Including initiatives at the global level in the regional discussions would further enlarge the paradigms in DRR.
