Demand for Climate Change and Disaster-related Statistics

International climate change and disaster relevant agendas are in urgent need of better data ...

- The Paris Agreement – reporting obligations and 2023 Global Stocktake
- The Sendai Framework – 2023 midpoint review and COP27 loss and damage funding mechanism
- The 2030 Agenda – 2023 midpoint review (SDG 13 and much beyond)

... requiring statistical standards and strong national statistical systems

- Tackling global data availability and comparability challenges
- Investing in countries’ data capacities in response to growing data demands
CC- and disaster-related SDG indicators in Asia-Pacific: Progress and gaps

• ¼ of CC-related SDGs do not have enough data
• Majority of those with some data have shown little progress
• A call for: improving data ecosystems, maximizing use of existing data, unleashing untapped data potentials
Thank you
