Social development

Number of years for the share of the population 65+ to increase from 7 to 14 per cent (selected countries)

- France (1865-1980): 115 years
- Sweden (1890-1975): 85 years
- United States (1944-2013): 69 years
- Australia (1950-2013): 63 years
- Kyrgyzstan (1950~2005): 55 years
- Russian Federation (1967-2017): 50 years
- Kazakhstan (1994-2039): 45 years
- Turkmenistan (2030~2073): 43 years
- Armenia (1950~1990): 40 years
- Tajikistan (2048-2085): 37 years
- Uzbekistan (2028~2055): 27 years
- Cambodia (2032~2058): 26 years
- Turkey (2009~2035): 26 years
- Japan (1971~1995): 24 years
- Sri Lanka (1950~1974): 24 years
- China (2002~2025): 23 years
- Thailand (2002~2022): 20 years
- Viet Nam (2017~2035): 18 years
- Republic of Korea (2000~2018): 18 years
- Singapore (2004~2021): 17 years
- Azerbaijan (1950~1967): 17 years

Legal coverage of old-age mandatory contributory pension of working age population (selected countries & latest year)

- Taking fewer years for 65+ population to grow as a share of the total population

- Less than half of the older population receive a pension in most countries the region...

- And coverage for women is generally lower than for men
