Regional Cooperation Mechanism on Low Carbon Transport: Creation of Green Transport Corridors in Asia and the Pacific

Session 9: Discussion on the Development of an Action Plan on Low Carbon Transport

25 - 26 September 2024
Hanoi, Vietnam

Wei-Shiuen Ng

Economic Affairs Officer, Transport Division, ESCAP

ESCAP
Economic and Social Commission for Asia and the Pacific

Action Plan on Low Carbon Transport (Group Discussion)

Scope

- What should be included in an action plan?
- Regional scope vs. subregional?

Process

- How to obtain stakeholders' support?
- When to present to ESCAP member States and on a ministerial level?

Previous Discussion Outputs (May and July 2024)

A regional action plan should...

- Include regional targets that are aligned with national goals, progress tracking tools and mitigation and adaptation measures.
- Be aligned with existing plans and frameworks to avoid creating additional burdens for Governments.
- Include all modes of transport.
- Reflect subregional priorities.
- Combine short-term and long-term strategies.
- Promote multi-stakeholder engagement and cross-sectoral consultation
- Be jointly developed by ESCAP member States
- Be submitted for consideration at the Fifth Ministerial Conference on Transport in 2026.

Moving Forward

- Publication of policy briefs
- Development of an action plan on low carbon transport
- Key messages to be carried forward to COP29 (November 2024)
- Developed of new projects depending on funding availability and countries' needs
