Use cases for EPIC

Use case 1: Assess if you are really in an ideal situation
Use case 2:
Revise existing policy, or draft a completely new policy

Use case 3:

Use case 4:

Use case 5:
How does it work?

For any given policy document...

Identify key issues that need action, & target groups

Main outputs from EPIC:

1. Clarify all key issues that policy should be addressing (*existing and new*)

2. Identify priority target groups (*existing and new*)

3. Develop a comprehensive indicator framework for the policy document (*build common understanding of current data needs*)
   - Integrating global and regional indicator frameworks
   - Identifying data disaggregation requirements
EPIC (Every Policy is Connected) is a tool that facilitates policy-data dialogue aiming to identify policy priorities as well as data needs. The tool integrates the four dimensions of development (Economic, Environmental, Institutional and Social) in every policy plan and develops a comprehensive indicator framework for policy monitoring. Learn more about EPIC.
What is other countries’ experience?

Samoa: In tourism sector

The Philippines: on gender policy

Bangladesh: on Disaster Risk Reduction policy (in progress)

Brunei Darussalam: Integrating SDGs into national plans (in progress)

Mongolia: Social dev. policy, Human dev. policy, national competitiveness policy (in progress)
