UNESCAP Regional Conference for Logistics Service Providers

Dr Ivan Petrov, FIATA President

13 July, UNESCAP Meeting
Welcome to Da Nang!
What can global collaboration bring to help build capacity in Region Asia-Pacific?
Growing Global Collaboration

Building Capacity

Expanding Asia-Pacific Market
Region Asia-Pacific on the Global Logistics Map

- **Rapid economic growth** has required a strong response as to infrastructure improvement
- **Quality training in the way of education and vocational skills** has been bumped up on the priority list for logisticians
- Natural disasters and pandemic have posed challenges for goods transport, but the region can come out stronger from lessons learned
- Climate change process adaptation has been key in the response to many of these catastrophic natural disasters, with **sustainable processes needed**
What’s next for the Region?

• Digitalisation is advanced in this part of the world, but still on a country-to-country basis

• Regional collaboration will benefit all countries, as trading partners will allow seamless borderless trade in the Region

• Robust and cooperative customs procedures across borders will make a way for the smooth flow of goods between countries

• Trade facilitation support by the likes of UNESCAP and FIATA will support members and countries in reaching their growth goals
