LEAVING NO ONE BEHIND:
Strengthening statistical inclusion of forcibly displaced and stateless populations at national level

Date: 24 August 2022
Time: 16:00-17:00 (UTC+7)
Online meeting: Webex

BACKGROUND
The commitment to “Leave no one behind” is central to the 2030 Agenda which aims to build inclusive systems and, ensure different groups including forcibly displaced and stateless people, are reflected in development efforts and policymaking. This creates an urgency to make everyone count in national data collection exercises and produce quality official statistics for sound decision-making and monitoring progress. International guidance on how to include refugees and internally displaced persons in national statistical systems are available in the International Recommendations on Refugee and IDP Statistics (IRRS and IRIS), which were endorsed by the UN Statistical Commission (UNSC) in 2018 and 2020, respectively. A similar set of recommendations on statelessness statistics are currently being developed and will be discussed at the UNSC in 2023. In response to this unique window of opportunity, this session aims to spotlight work conducted by different EGRISS country members to implement the IRRS and the IRIS and ensure these populations are represented in national data collection efforts.
