VII. Electric Plug and Socket

7. The electric power in Hong Kong is 220V running at 50Hz and the plug type used is type G. Most hotel bathrooms also have outlets for 100 volts, but if not, you will need a transformer for any appliance or electrical equipment. The majority of electrical outlets in Hong Kong take a three-pronged UK-style plug. You can buy an inexpensive adaptor for your electrical equipment at most convenience stores. Delegates are strongly encouraged to carry their own adapters for use with laptops and other electrical appliances as the Secretariat will not be able to provide these. In case of need, adapters can be purchased from shops in the city dealing in electronic and electrical items.
