On pilot project(s)

Agenda item 2(e)

Questions for discussion

A. The Standing Commitee need to decide how to carry out further work/research to collect and validate data on pilot or ongoing activities and projects on cross-border paperless trade (e.g., the secretariat would be ready to support researchers/experts in the country to support data collection, but support from authorities are essential).

B. The Standing Committee may discuss how to select/prioritize pilot projects

Possible outcomes

- The Standing Committee recommends to the Parties that data on pilot, ongoing and planned cross-border paperless trade projects/activities should be collected and validated.
- The Standing Committee identifies the strategies to further explore the pilot projects on cross-border paperless trade (ideally a tentative list of pilot projects. Of course, the feasibility of conducting such pilot projects will be further studied).
