Reflecting on the implementation of the regional action programme for Sustainable Transport Connectivity in Asia and the Pacific phase I (2017–2021), Thailand strongly agree with the continued implementation of the Regional Action Programme which focus more on the Sustainable Development Goals, Paris Agreement and the cross-sectoral social, economic and environmental agendas. The regional action programme (2022-2026) should be flexible, include existing thematic areas from phase I and adding other thematic areas related to environmentally sustainable and inclusive transport. In addition, capacity-building activities should be continued, in both physical and online modalities.

Moreover, Thailand also agree on the recommendation for the secretariat to establish effective partnerships with the private sector, non-governmental organizations, academic institutions and other relevant stakeholders in implementing the regional action programme. The partnership with relevant stakeholders will lead to a more effective and successful implementation.
