Thank you, Chair,

Distinguished delegates,
All participants,
Ladies and gentlemen,

With regard to the Regional Action Programme for Sustainable Transport Development in Asia and the Pacific, Indonesia puts its commitment to its implementation of integrated transportation system in the region, among others through the acceleration of digitalization and the application of technology in transportation sector with taking into account the
sustainability aspects to support the effective and efficient transport network and connectivity.

In this connection, aside from the use of Electric Vehicles, Indonesia encourages the use of alternative, low carbon and low sulphur fuels as well as non-motorized vehicles to create a more environmentally friendly transportation system in the Asia and the Pacific.

Therefore, Indonesia supports the Ministerial Declaration and the Regional Action Programme on Sustainable Transport to be adopted on the Ministerial Segment tomorrow to provide as a framework for stronger and a more comprehensive cooperation among the member states.

Indonesia stands ready to work together with all member states in realizing a resilient and sustainable transport system and connectivity in Asia and the Pacific.

I thank you.
