Session 2: Subregional Discussion on Building Back Better from COVID-19 while Advancing the Full Implementation of the 2030 Agenda for Sustainable Development

Zafar Makhmudov
Executive director
Regional Environmental Centre for Central Asia (CAREC)
How COVID-19 has affected environmental SDGs

a result of the pandemic - Refocus of main forces and resources from achievement of environmental SDGs to health, economic and social issues to support the population
How SDG 15 has been included in COVID-19 recovery measures

What policies and measures has your government or governments in North and Central Asia adopted to address the impacts on education/ gender equality/ life under water or life on land?

• 5 national and
• 2 Regional Strategies with Action Plan

are designed to mitigate land degradation from drought and sand dust storms in Central Asian countries and the region
Key policy recommendations to drive recovery and combating land degradation in an inclusive manner

- Expansion of the use of modern technologies and methods of combating the land degradation;
- Strengthening the strategic and institutional foundations of governance and the individual capacity of specialists;
- Improving interaction between government agencies and departments, research institutes through the development of permanent and facilitated Regional Dialogue Platform;
- Establishment of Regional Cooperation Mechanism
CAREC: Ongoing efforts in Central Asia

- Organization of Central Asia Pavilion at COP 26
- Development of Central Asian Climate Information Platform
- Promotion the establishment of a Regional Mechanism to work with Green Climate Fund
