**KAZAKHSTAN: Adding Value to Digitalization Efforts**

**Introduction**

The COVID-19 pandemic has deepened the economy of Kazakhstan by 3.6% in 2020 and continues to grow, showing signs of recovery in the first half of 2021 with an estimated 3.2% growth. The impact of the pandemic on the economy is evident in the sectors that have been hit the hardest such as tourism, transportation, and trade. The government has implemented various measures to support these sectors and ensure the smooth functioning of the economy. The sectors have been accompanied by the growth of the ICT and telecommunications, education, and health sectors. The government has also implemented various policies to support the digitalization of the economy and ensure the smooth functioning of the economy.

This Policy Brief highlights the urgent issues of the country and the need for further efforts to address the challenges faced by the country. The government has also implemented various policies to support the digitalization of the economy and ensure the smooth functioning of the economy.

**KYRGYZSTAN: The way ahead to address e-resilience readiness and co-deploy infrastructure**

**Introduction**

The COVID-19 pandemic brought significant economic challenges to the Kyrgyz Republic. The government has taken various measures to support the economy and ensure the smooth functioning of the economy. The government has also implemented various policies to support the digitalization of the economy and ensure the smooth functioning of the economy.

This Policy Brief highlights the urgent issues of the country and the need for further efforts to address the challenges faced by the country. The government has also implemented various policies to support the digitalization of the economy and ensure the smooth functioning of the economy.

**MONGOLIA: The e-resilience readiness**

**Introduction**

COVID-19 has put the economy under deep pressure, despite resilient action taken by the Government of Mongolia to contain the crisis. The COVID-19 pandemic, digital transformation, and new digital technologies could be an opportunity for all sectors, including health, education, and other economic sectors. It also presents a new opportunity for the digital transformation.

The government of Mongolia launched the "Digital Nation" initiative, which aims to transform the country into a modern and digital economy. The initiative includes the development of a national digital strategy, the implementation of digital infrastructure, and the promotion of digital literacy and skills.

This Policy Brief highlights the urgent issues of the country and the need for further efforts to address the challenges faced by the country. The government has also implemented various policies to support the digitalization of the economy and ensure the smooth functioning of the economy.
