<td>16.1 Effective institutions</td>
<td>16.2 Justice for all</td>
<td>16.3 Human trafficking</td>
<td>16.4 Illicit financial &amp; arms flows</td>
<td>16.5 Corruption and bribery</td>
<td>16.6 Inclusive decision-making</td>
</tr>
</tbody>
</table>
South-East Asia is **not on track** to achieve any of the 17 Goals by 2030, given the current pace of progress by countries in the subregion. However, some progress has been made towards no poverty (Goal 1), industry, innovation and infrastructure (Goal 9) and life on land (Goal 15). Areas indicating lack of progress are quality education (Goal 4), decent work and economic growth (Goal 8) and partnership for the goals (Goal 17). There are concerns about regression on clean water and sanitation (Goal 6), sustainable cities and communities (Goal 11), responsible consumption and production (Goal 12), climate action (Goal 13) and life below water (Goal 14).
• More than half of all the SDG indicators have sufficient data for tracking progress in the subregion.
• Data gaps remain mainly in environment-related goals (SDG 11, 12, 13, 14).
• Importance to accelerate production of disaggregated data so that vulnerable populations are identified, and no one is left behind.
