

Regional Workshop on Integrating Policy and Data to Leave no One Behind

6th - 9th February 2023, Daejeon

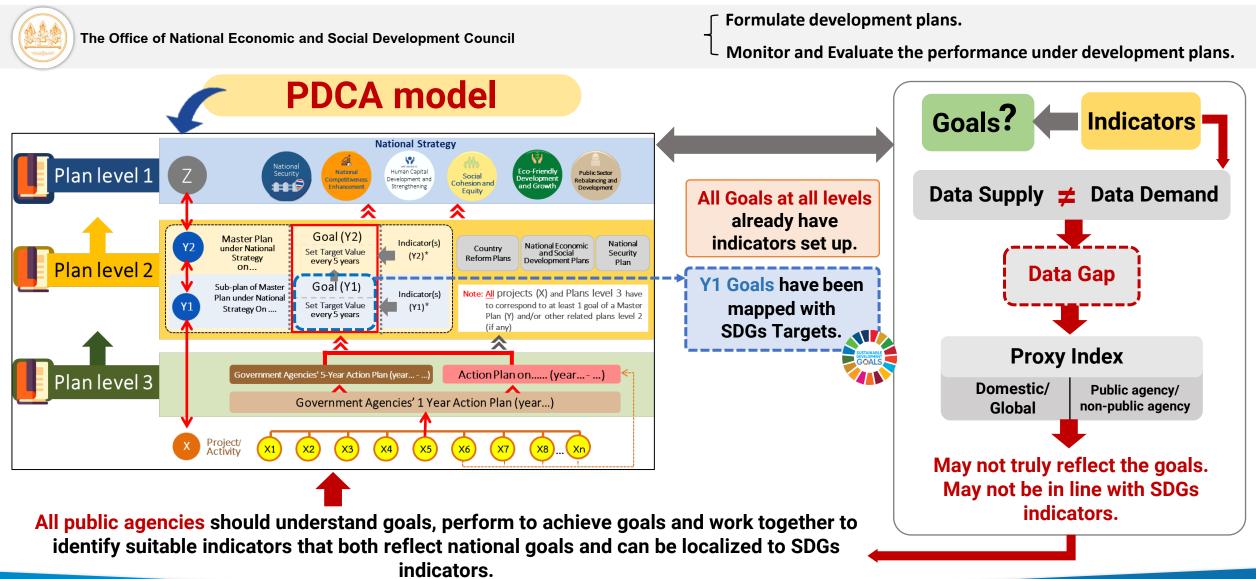

Thailand (10 Minutes)

Session 1: National processes and challenges in developing and monitoring indicator frameworks

Process and Challenges in developing and monitoring national indicator frameworks

eMENSCR: Electronic Monitoring and Evaluation System of National Strategy and

Country Reform

- According to regulations on monitoring, auditing and evaluation of the implementation of the national strategy and the National Reform Plan 2019, The Office of the National Economic and Social Development Council was designated to develop the information technology systems to be used for monitoring, auditing and evaluating the performance according to the national strategy and national reform plan.
- All heads of public agencies are required to report the progress of the annual plan through the system according to the list and timeline assigned by the NESDC.
- eMENSCR is jointly developed by NESDC, NECTEC (The National Electronics and Computer Technology Center) and NSTDA (The National Science and Technology Development Agency)
- eMENSCR is an information system used for monitoring, auditing and evaluating the performance of the agency through plan, various projects or actions to drive development according to the national strategies and the national reform plans. It is a large data system that integrates information from various government agencies.

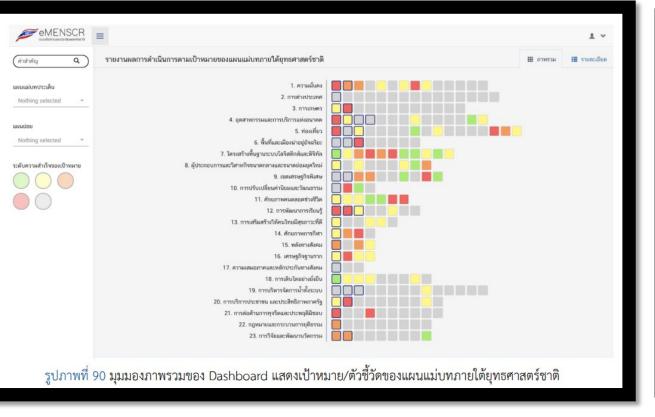

eMENSCR: Electronic Monitoring and Evaluation System of National Strategy and Country Reform

- eMENSCR composite of 6 sections;
- M1 = The alignment with other plans
