

**Statistical literacy among
journalists and civil society:
Lessons in Central Asia**

By Altynai Mambetova

SCHOOL OF DATA

What we are doing in School of Data?

School of Data ---

we are empowering communities and expanding opportunities to use data and promoting partnerships between users and producers of data for better ecosystem.

Our audience

We are targeting the whole data ecosystem

It is not efficient to engage only one part when others are interdependent

That's why we are working with: government officials, stats departments, civil society, NGO's, journalists, universities, international organizations

Why it is important for civil society and media to use stats?

- With the technologies development the role of journalist has changed
- More stories are waiting to get uncovered
- More data, more stories → more ways to engage audience
- Data-driven advocacy campaigns which have evidence based approach

What are the challenges?

In Newsrooms

Journalists don't study statistics or math

Most of the newsrooms are not agile

What are the challenges?

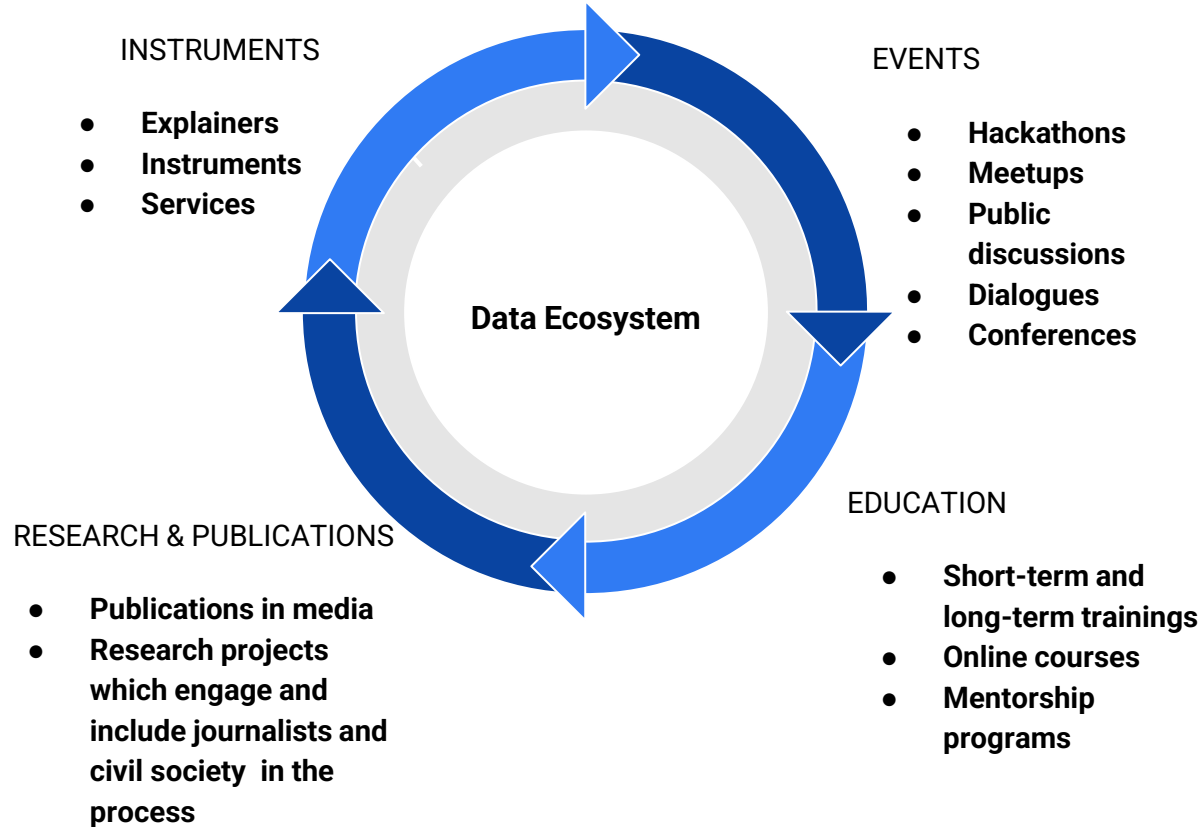

Technical

Non-unified formats of data

Low level of Digital literacy

What we are doing in Central Asia

Events

- Conferences engaging local stats offices, private companies, civil society, journalists
- Hackathons with data-producers and data-users
- Public discussions
- Meetups

Education

Online course:

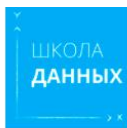

- Data Communication
- Gender Data Communication
- GeoData Viz
- Advanced Data Analysis

Mentorship programs:

- For newsrooms
- For researchers and civil society

Trainings

- Journalists+Researchers+Civil Society

The fourth school semester was for the first time held in an online format for schools in Kyrgyzstan.

School of Data, together with [Urban Initiatives](#) and researchers, conducted a survey and examined how online learning took place and how teachers and students perceived the transition to online learning. The survey was taken by 338 teachers, as well as 1324 students from all over Kyrgyzstan.

ДОМАШНИЕ ДЕЛА

МУЖ

ЖЕНА

Instruments

Services to GET the data in a machine readable formats for journalists: scrapers

Dashboards for researchers and civil society

Все данные обновляются автоматически ежедневно.
Самое главное – они доступны для скачивания.

conclusion

- Civil society and journalists need to be engaged in the planning
- Data literacy should to be included in the program of universities
- Research results and reports should to be explained and data shared

We have the same goal!
