Regional Consultation on Facilitating Innovative Action on Disability-inclusive and Gender-responsive Disaster Risk Reduction in Asia and the Pacific

5 and 6 May 2022
10:00 to 13:00 hours
(GMT+7, Virtual)
Bangkok, Thailand
Session 2: Challenges and opportunities in DiDRR

Day: 5 May 2022

Presentation topic:
What to expect from the standpoint of a disability organization

Presenter name:
Yuhei Yamada,
Executive Director Porque, National Group of Mentally Disabled People, Japan
What are two to three key implementation challenges of the DiDRR?

- Skewed understanding of disability: lack of fundamental knowledge
- Limited budget allocated for DiDRR
- Lack of evidence-based law, policy, strategy, action plan and implementation manuals that mandate and motivate specific actions to expedite DiDRR actions
What is one thing you would like to highlight to overcome the key challenges? It would be good if you can cite examples to support your statement. Each panelist might have different perspectives as follows:

In order to secure a budget for DiDRR and realize legislation, it is important to accumulate legislative facts and clarify the legitimacy of policies. For that purpose, the practice of having the disaster prevention department as a focal point is of great significance.
Thank you very much
