1. UNESCAP Executive Secretary visits Bangladesh

DHAKA, BANGLADESH, 11 December 2019 Dr Armida Salsiah Alisjahbana, Executive Secretary of the United Nations Economic and Social Commission for Asia and the Pacific (UNESCAP) called on H.E. Ms Sheikh Hasina Wazed, Prime Minister of Bangladesh during her official visit to Bangladesh on Wednesday 11, 2019. The Prime Minister briefed the Executive Secretary on the key priorities of her government and requested support of UNESCAP especially in respect of graduation of Bangladesh from LDC status, for improving transport connectivity and for acceleration of SDGs. The Executive Secretary invited the Prime Minister to deliver a keynote address at the 76th Annual Session of the UNESCAP Commission to be held in Bangkok in May 2020. During her stay in Dhaka, the Executive Secretary also called on a number of dignitaries including the Ministers of Finance, Commerce, Planning, BIMSTEC Secretary-General, the United Nations Resident Coordinator and addressed the United Nations Country Team.

2. The Third South Asia Forum on SDGs calls to accelerate sustainable development progress
Dhaka, Bangladesh, 8 – 9 December 2019 The Third South Asia Forum on Sustainable Development Goals (SDGs), was jointly organized by UNESCAP and the Government of Bangladesh in Dhaka. With over 100 participants representing governments, think-tanks, international development partners and civil society from all the 8 South Asian countries, the Forum underscored on the need for accelerated action to achieve the SDGs by 2030, including through regional cooperation. Dr. Nagesh Kumar, Director, UNESCAP-SSWA, in his opening remarks, noted that with a disproportionately larger share of 36 percent of all people living in extreme poverty and hunger globally, the world could not achieve SDGs if South Asia fails to do so. Citing the ESCAP’s Asia and the Pacific SDG Progress Report 2019, he said that South Asia was lagging behind in 15 out of 17 goals, despite a sustained and robust economic growth rate. Hence, business-as-usual was not an option. A sub-regional preparatory for the Asia-Pacific Forum on Sustainable Development (APFSD) and the High-Level Political Forum, the Forum was also addressed by senior dignitaries from Bangladesh including Mr Monowar Ahmed, Secretary-ERD; Mr Khandker Anwarul Islam, Cabinet Secretary; Mr Abul Kalam Azad, Coordinator for SDG Affairs in the Prime Minister’s Office; Mr Nojibur Rehman, Principal Secretary to the PM; Dr Shamsul Alam, Member-GED; Ms Mia Seppo, the United Nations Resident Coordinator in Bangladesh; H.E. Dr Puspa Raj Kadel, Vice-Chairman of National Planning Commission of Nepal, H.E. Mr Shahidul Islam, Secretary-General, BIMSTEC, among other dignitaries.

3. Sustainable graduation challenges of South Asian LDCs discussed in Kathmandu
Kathmandu, Nepal, 14 - 15 October 2019 To assist South Asian LDCs in looking for policy options to overcome the challenges related to LDC graduation, UNESCAP in collaboration with the Government of Nepal organized a subregional workshop on SDGs and Sustainable Graduation of South Asian LDCs in Kathmandu, Nepal, which was attended by policymakers of Afghanistan, Bangladesh, Bhutan, Nepal and the Maldives. Discussions focused on specific challenges faced by Nepal as well as common challenges facing South Asian LDCs for sustainable graduation. Resource persons, as well as participants, shared their own experiences and best practices in this regard. The work programme for assisting the South Asian LDCs in 2020 was also developed and discussed. Delivering the opening remarks, Dr Nagesh Kumar, Director, UNESCAP-SSWA indicated that the workshop was conducted as a part of UNESCAP’s initiative to assist the three South Asian LDCs meet the challenge of graduation in a smooth and sustainable manner. The workshop was inaugurated by H.E. Dr Puspa Lal Kadel, Vice Chairman of the National Planning Commission of Nepal and was also addressed by Ms Valerie Julliand, the United Nations Resident Coordinator in Nepal; heads of think-tanks and resource persons drawn from MPFD at the UNESCAP headquarters and SSWA office in New Delhi.

4. UNESCAP Panel at SDPI Conference focuses on regional cooperation for achieving SDGs

ISLAMABAD, PAKISTAN, 4 Dec 2019
UNESCAP organized a Panel Discussion on Promoting Regional Cooperation in South Asia for Achieving SDGs at the SDPI’s 22nd Sustainable Development Conference on 4 December 2019. The main objective of the panel discussion was to brainstorm options for creating an inclusive subregional cooperation framework that will help the member States achieve SDGs. The panel was moderated by Dr. Rajan Sudesh Ratna, ESCAP-SSWA and the speaker included Mr. Abdul Basir Azimi, Research Fellow, Biruni Institute, Afghanistan; Dr. Amitabh Kundu, Distinguished Fellow, RIS, India; Dr. Fatemeh Chemali Chirani, Political Scientist and Journalist, Iran; Dr. Abid Qayum Suleri, ED, SDPI, Pakistan; Ms. Safiara Kawsar Usman, Ministry of Health, Maldives; Dr. Posh Raj Pandey, Chairman, SAWTEE, Nepal; and Ms. Hasna Munas, Research Analyst, Verité Research, Sri Lanka. The panel unanimously expressed that regional cooperation and collaboration can play a critical role in achieving the SDG targets in South and South-West Asian countries.

A side event to launch the EIF-UNESCAP project on E-Commerce Capacity Building for women-led MSMEs in South Asia was also organized.

5. Bhutan Workshop discusses strategies for Sustainable Graduation of South Asian LDCs
THIMPHU, BHUTAN, 1-2 October 2019 UNESCAP and the Royal Government of Bhutan, organized a workshop on SDGs and Sustainable Graduation of South Asian LDCs in Thimphu, Bhutan. It was second in the series of workshops that UNESCAP organized on the theme to assist three South Asian LDCs namely Bangladesh, Bhutan and Nepal in their sustainable graduation. The objectives of the Workshop were to identify priorities and developmental challenges facing Bhutan and other South Asian LDCs towards a smooth and sustainable transition to graduation and identified future capacity building needs for effective and sustainable graduation from LDC. The participants included government representatives from Bangladesh, Bhutan and Nepal. The workshop was opened by H.E. Mr Dorji Tshering, Minister for Works and Human Settlement, Royal Government of Bhutan and was also addressed by the United Nations Resident Coordinator Mr Gerald Daly. The workshop also had resource persons from the secretariats of the World Trade Organization (WTO) and Enhanced Integrated Framework (EIF) in Geneva besides those from MPFD and SSWA Office of UNESCAP. A follow-up action plan was drawn focusing on how to address the identified gaps using integrated approaches.

7. Supporting SDG Achievement through building analytical capacity in South Asian LDCs

NEW DELHI, INDIA, 18 - 22 November 2019 At the request of Afghanistan and Bhutan, UNESCAP is supporting their fledgling think-tanks in strengthening their capacity for evidence-based policy research to feed into the policy making process. A workshop was organized at UNESCAP-SSWA for staff of the two institutions during 18-22 November 2019 in New Delhi. At the workshop, the participants were exposed to think-tanks based in New Delhi as well as heads of think-tanks in Bangladesh, Nepal, Sri Lanka, to gain the first-hand experience.

Subsequently UNESCAP team undertook a consultation mission to Bhutan on 23 December 2019 to review the progress made following the New Delhi workshop. The Bhutanese officials reported that the terms of reference and other arrangements for establishing the think-tank have been prepared and were under consideration of the high authorities. UNESCAP team also met with the United Nations Resident Coordinator who appreciated UNESCAP’s support to the UN Country Team in Bhutan.

8. The Bangladesh launch of the E-Commerce capacity-building for women-led MSMEs in South Asia
DHAKA, BANGLADESH, 11 December 2019. UNESCAP in collaboration with the Government of Bangladesh launched a project to build the capacity of women-led MSMEs in harnessing eCommerce as a tool to expand their businesses and become part of a wider regional and global supply chains in South Asian LDCs. The National Inception Workshop held in Dhaka brought together women entrepreneurs, civil society organizations working on women empowerment, Government Departments/Ministries, Apex Chamber’s representatives, experts, etc., to share experiences on entrepreneurship in Bangladesh and other South Asian countries, and the future work plan. The event had the participation of H.E. Ms. Selima Ahmad, Member of Parliament and President, Bangladesh Women Chamber of Commerce and Industry, Mr. Md. Kamal Hossain, Additional Secretary and Director General, WTO Cell, Ministry of Commerce, Government of Bangladesh and Ms. Shomi Kaiser, President, E-Commerce Association of Bangladesh (e-CAB) and Director, FBCCI, among other stakeholders.

9. Dialogue on Harnessing the Potential of South Asian Cooperation for Sustainable Development

NEW DELHI, INDIA, 20 November 2019. Policy Dialogue on Regional Cooperation for SDGs Achievement in South Asia organized on 20 November 2019 in New Delhi explored opportunities and challenges South Asia faces in strengthening regional cooperation and developing actionable agenda to support the implementation of the 2030 Development Agenda through coalition building and partnerships in the region. Organized by UNESCAP jointly with RIS, the Dialogue had the participation of heads of think-tanks and private sector organizations in Afghanistan, Bangladesh, Bhutan, India, Nepal and Sri Lanka.

10. Civil Society Organizations discuss key challenges faced by South Asian countries in achieving SDGs

DHAKA, BANGLADESH, 7 December 2019. The South Asia Peoples Forum on Sustainable Development 2019 was held on 7 December 2019 in Dhaka ahead of the South Asian Forum on SDGs. This meeting reaffirmed the role of civil society organizations in influencing the processes and deliberations at the subregional and regional levels including the Third South Asia Forum on the Sustainable Development Goals, Asia and Pacific Forum on Sustainable Development (APFSD) and the High-Level Political Forum (HLPF) of the United Nations, and advancing the shared commitment of CSOs in facilitating the achievement of SDGs in South Asia in 2020. Civil society organizations fully participated and provided their inputs in the Third South Asia Forum on the Sustainable Development Goals on 8–9 December 2019. Mr Chrispin Kapinga represented UNESCAP at the Forum.
11. Asian business leaders told to foster job-creating, inclusive and sustainable growth

SINGAPORE, 8 November 2019 While addressing the Asian Business Leaders Conclave in Singapore, Dr. Nagesh Kumar, Director, UNESCAP-SSWA highlighted the relevance of sustainability as a business strategy, directing the new digital revolution like artificial intelligence to material and energy-saving rather than displacing workers, addressing rising inequalities, leveraging regional connectivity and cooperation for the Asian Century. Organized by the Economic Times, the conclave brought together business leaders from India, Singapore, Malaysia, Cambodia, Sri Lanka, Indonesia and Myanmar, among others.

SOUTH ASIAN COUNTRIES HIGHLIGHT THE IMPORTANCE OF GLOBAL CLIMATE ACTION AT THE UN CLIMATE CHANGE CONFERENCE (COP25) IN MADRID, SPAIN

Afghanistan:

Mr. SCHAH-ZAMAN MAIWANDI, Director-General, National Environmental Protection Agency of Afghanistan said that Afghanistan strives to implement climate action towards a low emission development path and has started integrating climate change and sustainable development in its national development agendas despite the challenging situation it faces. In particular, Afghanistan has formulated the Climate Change Strategy and Action Plan and initiated the process for the revision of its National Adaptation Plan.

He highlighted that in order to reduce emissions of greenhouse gasses, Afghanistan has recently approved a Five-Years Action Plan on air pollution to reform the public transport system, instituted a mandatory tree planting scheme starting in 2021, and improved the management of use of coal as an energy source and increase the supply of clean energy sources such as solar and wind power.

Concerning actions to limit global warming to 1.5°C, he stated that substantial changes need to take place to achieve the resilience and sustainable future. He stressed further that all nations must act boldly and ambitiously in helping the most vulnerable and least developed countries. To accelerate efforts to lower emissions and ensure climate-resilient development pathways, we must make sure that access to existing mechanisms governing climate action is streamlined and simplified and the industrialized economies show firm commitments to decarbonize and mitigate future climatic changes as well as show willingness to jointly mobilize USD 100 billion per year by 2020 as agreed in 2010.
Bhutan:

H.E. Mr. YESHEY PENJOR, Minister, Ministry of Agriculture and Forest, Royal Government of Bhutan, said that the world is not on track to achieving the goal of 1.5°C as required agreed in the Paris Agreement. Significant, bold, and immediate action needs to be taken in this regard as time is running out. He emphasized that his country is committed to remaining carbon neutral and will prepare a long-term low emission climate-resilient development strategy in 2020. He underscored that as a “land-locked” country with a “fragile and mountainous ecosystem,” Bhutan is among the most vulnerable countries to the adverse impacts of climate change conditions.

He stressed that COP25 must deliver concrete decisions on loss and damage and a robust rule for implementation of market and a non-market mechanism that ensure environmental integrity and enhanced financial support for climate action. Bhutan remains committed to the principles and objectives of the Convention and the Paris Agreement and calls on all Parties to be flexible, open and constructive in delivering a strong climate action and the support needed to achieve this goal.

India:

H.E Mr. SHRI PRAKASH JAVADEKAR, Union Minister for Environment, Forest and Climate Change (MoEF&CC), highlighted that India has reduced emissions intensity of GDP by 21 percent and is on track to achieve the goal of 35% emissions reduction. Prime Minister Modi has announced a 175 GW target for renewables, and 83 GW has already been achieved. The Prime Minister has subsequently increased the target to 450 GW at the recent UN Climate Action Summit. A carbon tax on coal production at the rate of Dollars 6 per tonne has been introduced. More actions include blending of 20% ethanol in petrol by 2030, leapfrogging from Bharat Standard IV to Bharat Standard VI for vehicle emission norms from 1st April 2020, fitting 360 million LED bulbs in homes, replacing 10 million conventional streetlights with LED lights, etc. India promised to create additional carbon sinks of 2.5 to 3 billion tonnes of carbon equivalent to increase its green cover by employing projects like urban forests, school nursery, agroforestry, water, and fodder augmentation in the forest area, etc. As a result, in the last five years, its green cover has ultimately increased by 15,000 sq.km. Furthermore, India had launched the Coalition for Disaster Resilient Infrastructure to support countries to exchange knowledge and provide technical support in developing disaster and climate resilient infrastructure. He highlighted the fact that India led the countries that are on track in meeting their NDCs. As we approach the end of the Pre-2020 period, one should reflect on the progress. Unfortunately, annexed countries have not met their Kyoto Protocol targets. Neither their NDCs reflect ambitions nor they have shown willingness to enhance their commitments. In the important issue of finance, developed world promised 1 trillion dollar in last 10 years, and not even 2 percent has materialized. Technology development and transfer at affordable costs is crucial for developing countries. If we are dealing with a disaster, nobody should profit from it. So, he proposed to have more joint research and collaboration, grant finance made available for meeting the targets. He ended by saying that this was the time for ownership and responsible action. India has and will continue to do its bit – expecting commensurate multilateral action with developed countries taking the lead.

Nepal:

H.E. Mr. SHAKTI BAHADUR BASNET, Minister of Forests and Environment (MoEF), raised the concern that the Paris Agreement commitment to maintaining global temperatures below 1.5 degrees Celsius seems untenable as the carbon emission is constantly increasing, with a record of over 55 billion tons of GHGs in 2018. This pattern of carbon emissions growth threatens countries particularly the least developing countries like Nepal. South Asia with a high number of planet’s human population, is vulnerable to the effects of global
warming and demands special attention and needs in considering the livelihood of its most poor and vulnerable communities.

Nepal is implementing a climate change agenda with its National Climate Change Policy, which channels over 80% of climate financing to grassroots activities. Vulnerability Risk Assessment and National Adaptation Plan have been introduced and the country is completing its Disaster Preparedness and Response Plans for all its Municipal areas. Finally, to significantly increase the ambition and enhance implementation of the climate change agenda as well as boost Nepal’s core portfolio of national climate-resilient and low-carbon investments, access to climate change financing, technology transfer, and bottom-up capacity-building must be a priority.

Pakistan:

H.E Mr. MALIK AMIN ASLAM KHAN, Federal Minister - Climate Change / Advisor to Prime Minister, said that although it contributes less than 1% of the global greenhouse gas emissions, yet, every year, it keeps on climbing up the ladder of climate vulnerability. While facing this daunting challenge, Pakistan remains equally committed to raising its ambition for climate action and lead the response in shaping a new future.

Pakistan has embarked itself on a sustainable development pathway, in line with the spirit of the Paris Agreement. Led by the Prime Minister Imran Khan’s green vision, and backed with concerted action, Pakistan has made a shift towards a “clean and green Pakistan.” It has introduced the electric vehicle policy, which targets a 30% shift to electric vehicles by 2030. Earlier this month, the city of Karachi in Pakistan launched the world’s first “zero emissions” metro line – which incidentally became the first transport project to be financed under the Green Climate Fund. The country has banned single-use plastic bags and is also using innovative initiatives and an eco-system-based adaptation to curb climate change by turning catastrophic floods into an opportunity for recharging aquifers and naturally restoring ecosystems. An “Eco-System Restoration Fund” to facilitate Pakistan’s transition towards climate compatible development through targeted initiatives on afforestation, biodiversity conservation, and ecological restoration is also being introduced.

He urged that raising the ambition to deal with climate change must be seen in the context of specific national circumstances and development imperatives of developing countries as well as the unfulfilled commitments about mitigation, technology transfer, and provision of climate finance, all of which need to be met urgently and scaled up significantly.

Sri Lanka:

Ms. S. HASANTHI URUGODAWATTE DISSANAYAKE, Director-General of Ocean Affairs, Environment and Climate Change, Ministry of Foreign Relations of Sri Lanka said that the rise of the global mean temperature and the resulting changes have created adverse impacts on key sectors within Sri Lanka, such as agriculture, forestry, biodiversity, marine and fisheries, tourism and energy (hydro-power) sectors, leading to disastrous effects on its people, ecosystems and economy. With this in mind, Sri Lanka recognizes the importance and the role of COP, which highlights the need to take effective and definitive steps for finalizing the follow-up actions of the Paris Agreement as climate change impacts are real, and Sri Lanka experiences them daily.

She highlighted further that Sri Lanka has identified and implements three broad approaches, based on which many projects are implemented to build resilience among the most vulnerable communities, ecosystems and economic sectors of the country - Rehabilitation of ancient reservoir cascade system-ecosystem-based adaptation, to address the prolonged drought situation in the dry zone; rehabilitation and enrichment of watersheds and catchments to ensure perennial water flow with the aim to address the prolonged drought situation in the dry zone; and diversion of excess water in the wet zone to dry zone where prolonged droughts are predicted and control floods in the wet zone. These affirmative actions are also manifested in the country’s Nationally Determined Contributions (NDCs) and the National Adaptation Plan (NAP) with due attention given to vulnerable communities and ecosystems.

Sri Lanka has introduced mangrove restoration to increase the forest cover from 29% to 32% by 2030. In line
with these commitments, Sri Lanka undertook and led the Commonwealth Blue Charter Action Group on Mangrove Ecosystems and Livelihoods in 2018. Sri Lanka is also committed to inclusive and participatory climate actions to ensure that affirmative actions are taken to address the vulnerabilities of climate change. She stated that due to the increasing number and intensity of extreme weather events, vulnerable countries are in urgent need of financial resources for technology development and transfer and capacity building to minimize and compensate for the losses and damages.

She reiterated the need for inclusion and participation of vulnerable communities, and multiple stakeholders - including civil society, private sector, youth, women, academia and strengthening the public participation at all levels as well as the importance of gender responsiveness in climate action and appreciated the review of the Lima Work Programme on Gender and its Gender Action Plan at COP25.

**Bangladesh, Nepal ahead of India as growth in South Asia slows down:** (Source: The Economic Times) 14 October 2019
Recent economic developments in Bangladesh have been remarkable. Over the past decade, GDP per capita has almost tripled, reaching USD 1,700 in 2018. The annual GDP growth has averaged 6.5 percent and is forecast above 8 percent in 2019. Good progress is being made towards achieving UN 2030 Agenda for Sustainable Development, particularly towards crucial goals such as ensuring that everyone has access to clean water and sanitation and clean and affordable energy. Bangladesh’s economic dynamism enabled the country to meet the criteria for graduation from the Least Developed Country (LDC) status last year. If, as expected, the country meets the criteria again in 2021, Bangladesh will be recommended for graduation in 2024 by the United Nations General Assembly, writes Armida Salsiah Alisjahbana.
