The Sixth South and South-West Asia Forum on the Sustainable Development Goals was held from 5 to 7 December 2022, in Islamabad, Pakistan, in conjunction with the Government of Pakistan and the Sustainable Development Policy Institute.

This year’s theme, “Accelerating the recovery from COVID-19 and the full implementation of the 2030 Agenda for Sustainable Development at all levels” provided ample ground to facilitate discussions on overcoming global challenges within the subregion that were aggravated by the 3 Cs – climate change, the COVID-19 pandemic, and conflict.

Opening the Forum, United Nations Under-Secretary-General and Executive Secretary of ESCAP Armida Salsiah Alisjahbana drew attention to the multiple crises Governments in the subregion are currently juggling with while endeavouring to build back better. She underscored, “The Goals of the 2030 Agenda for Sustainable Development remain as relevant as ever, especially as challenges become greater and more complex than before.”

Ahsan Iqbal Chaudhary, Federal Minister Ministry of Planning Development and Special Initiatives, Government of Pakistan further highlighted, “As the world undergoes unusual times, innovative forms of knowledge exchange, technology transfer, emergency response and the recovery of livelihood and economies among the nations in the global South, particularly South and South-West-Asia, are of immense importance than ever.”

“As nations and the world recover from the COVID-19 pandemic, platforms such as the Forum are useful to identity and devise collective regional action to address the various caveats that weigh down on our SDG progress,” added Shehan Semasinghe, Minister of State for Finance, Sri Lanka.
Esala Ruwan Weerakoon, Secretary-General of the South Asian Association for Regional Cooperation also observed that, “Enhanced regional connectivity in terms of transport, digital and people-to-people connectivity will substantially improve our chances of achieving the 2030 Agenda.” United Nations Under-Secretary-General and Executive Secretary of ESCAP, Ms. Armida Salsiah Alisjahbana, noted that “the Sustainable Development Goals remain as relevant as ever, especially as challenges become greater and more complex than before”.

Throughout the forum, delegates noted with concern that at the current slow pace, South and South-West Asia may only achieve the Sustainable Development Goals decades after the original 2030 goalpost. Despite significant reductions in income poverty, the subregion still has the highest multi-dimensional poverty ratio among all subregions, at almost 30 per cent. Meanwhile, the subregion is also regressing on three Goals, namely, Goal 11 (sustainable cities and communities), Goal 12 (responsible consumption and production), and Goal 13 (climate action).

Delegates also emphasised that closer regional cooperation was critical for accelerating the implementation of the 2030 Agenda for Sustainable Development – and that evidence-based policies, advisory and technical assistance, capacity building, knowledge sharing, and sharing of good practices should be the foundation for such cooperation.

More than 1000 officials and key stakeholders from 10 countries participated in the Forum (in person and on-line) and further shared their recommendations on how to accelerate the progress towards SDG 6 (clean water and sanitation), SDG 7 (affordable and clean energy), SDG 9 (industry, innovation, and infrastructure), SDG 11 (sustainable cities and communities) and SDG 17 (partnerships for the Goals).

Organised annually by UNESCAP as one of the five subregional preparatory meetings for the Asia-Pacific Forum on Sustainable Development and the global UN High-Level Political Forum (HLPF), the SDG Forum facilitates dialogue and deliberations among government officials, stakeholder groups and development partners. It also provides a unique platform for peer learning and knowledge sharing on subregional efforts, for understanding subregional priorities and for identifying opportunities for regional cooperation.

Policy Dialogue on Regional Cooperation for Sustainable Development in South and South West Asia – Role of the South Asia Network on the Sustainable Development Goals

Organised in tandem with the Sixth South and South-West Asia Forum on the Sustainable Development Goals (SANS) to reflect on what had been identified during the forum as recommendations for accelerating the implementation of the 2030 Agenda for Sustainable Development in South and South-West Asia. The dialogue also discussed possible pathways for SANS and other networks of think tanks and academia to support regional cooperation and progress on the Sustainable Development Goals. Strong research, sharing of data and knowledge, and intra-regional collaboration were listed as necessary drivers for the promotion of regional collaboration. The meeting also echoed the priority areas for the subregion, where further work and cooperation initiatives must be taken in areas of climate change, disaster risk reduction; cross-border connectivity; economic diversification; digital inclusion etc. Notably, the panel recommended establishing parliamentary committees and commissions to facilitate knowledge sharing between governments and other actors, as well as the organising of more policy dialogues between governments. I. KEY ACTIVITIES ORGANIZED BY ESCAP ON SOUTH AND SOUTH-WEST ASIA

1. High-Level Policy Dialogue on E-Commerce and Digital Marketing: Challenges and Opportunities for Women-led SMEs in South Asia

New Delhi, India, 15-16 December 2022. With an aim to facilitate and support women entrepreneurs, United Nations ESCAP and the Enhanced Integrated Framework, Geneva under the project "E-Commerce Capacity Building for Women-led MSMEs in South Asia" undertook a multifaceted approach towards empowering women entrepreneurs in South Asia in becoming part of new local, regional and international supply chains through the use of e-commerce and digital marketing tools. As a culmination of the project, the two-day event brought together stakeholders with varied expertise for thought-provoking dialogue and policy advocacy on aspects impacting women entrepreneurs and the way forward in empowering women economically through e-commerce and digital marketing. Read more here.

2. National Training for Women Entrepreneurs on Promoting Business through E-commerce and Digital Marketing
Thimphu, Bhutan, 23-25 November 2022. As part of the “E-Commerce Capacity Building for Women-led MSMEs in South Asia” Project undertaken by ESCAP with an aim to facilitate and support women entrepreneurs through the use of e-commerce and digital marketing tools, this training event in Bhutan was attended by over 45 participants. Welcome remarks of the inaugural session were made by Ms. Mikiko Tanaka, Head, ESCAP Subregional Office for South and South-West Asia; Dr Ratnakar Adhikari, Executive Director, Enhanced Integrated Framework, Geneva; and Ms. Karla Robin Hershey, UN Resident Coordinator in Bhutan. Mr. Sonam Tenzin, Director General, Department of Trade, Ministry of Economic Affairs, Government of Bhutan, gave the inaugural address. Read more here.

3. Dialogue on Strategies for Accelerating Achievement of the SDGs in Bhutan and Building Back Better in support of the 13th Five-Year Plan

Thimphu, Bhutan, 22 November 2022. In continuation of ESCAP’s capacity building support to the Government of Bhutan and development organisations for accelerating the achievement of the Sustainable Development Goals, ESCAP organised a brainstorming session with stakeholders to identify critical opportunities, enablers, challenges and barriers to the achievement of the 2030 Agenda for Sustainable Development in Bhutan. The dialogue also aimed to identify core areas of policy research that the think tanks could undertake to support the development and initial implementation of Bhutan's upcoming 13th Five-Year Plan. Ms. Mikiko Tanaka, Head, ESCAP SSWA Office, and Aum Chime P Wangdi, Secretary General Tarayana Foundation, Bhutan, gave welcome remarks. Others in attendance included Ms. Sonam Pem, Executive Director, Tarayana Foundation, Mr. K. Dorji, Ministry of Economic Affairs, Bhutan, Mr. Chencho Lhamu, Executive Director, Bhutan Centre for Media and Democracy, and other representatives of civil society organisations. Read more here.

4. Policy Dialogue on Deepening Linkages between South Asia and Southeast Asia
New Delhi, India, 14 November 2022. The policy dialogue, jointly organised by ESCAP Subregional Office for South and South-West Asia (ESCAP-SSWA) and the World Bank, explored new approaches to revitalise trade and economic links between the two subregions, focusing on areas such as digital economy, environmental goods, and services. Ms. Mikiko Tanaka, Director and Head, ESCAP-SSWA and Ms. Cecile Fruman, Director, Regional Integration and Engagement in South Asia, World Bank, opened the dialogue. Panellists include Ms. Indu Nair, Joint Secretary (ASEAN), Ministry of Commerce, India; Ambassador Jayant Dasgupta, Former Representative of India to the WTO; and Prof. Amita Batra, Chairperson, Centre for South Asian Studies, Jawaharlal Nehru University. Read more here.

5. Experts Group Meeting on Enhancing the Role of foreign Investment for Structural Economic Transformation in LLDCs

New Delhi, India, 10-11 November 2022. Organised by the ESCAP Subregional Office for South and South-West Asia (ESCAP-SSWA) and the UN-OHRLLS, the meeting sought to review how LLDCs can best attract and utilise foreign investment for supporting structural transformation of their economies and to provide recommendations in this area that can advance the implementation of the Vienna Programme of Action and support the achievement of the SDGs by the LLDCs. The meeting discussed experiences and effective practices from LLDCs and other developing countries. The meeting was opened by Ms. Mikiko Tanaka, Director and Head, ESCAP-SSWA, and Mr. Sandagdorj Erdenebileg, Chief, OHRLLS. Major General Vetsop Namgyel, Ambassador of Bhutan to India and Dr. Shankar Prasad Sharma, Ambassador of Nepal to India addressed the meeting. Read more here.
6. National Training for Women Entrepreneurs on Promoting Business through E-commerce and Digital Marketing

Colombo, Sri Lanka, 1-3 November 2022. The ESCAP Subregional Office for South and South-West Asia (ESCAP-SSWA) organized a national training for women entrepreneurs in Colombo, Sri Lanka, in partnership with the Government of Sri Lanka and the Enhanced Integrated Framework, Geneva. This training was organized to equip women entrepreneurs from Sri Lanka to use e-commerce and digital marketing platforms for enhanced access to supply chains well as contribute towards the global economic development. Additionally, this training helped to establish a network amongst the women entrepreneurs by providing an opportunity to showcase their products, and services and share their entrepreneurial journey with an aim to inspire and motivate fellow women entrepreneurs. H.E. Dr. Ramesh Pathirana, Minister of Plantation Industries and Minister of Industries of Sri Lanka gave the inaugural address, while Ms. Mikiko Tanaka, Director and Head, ESCAP-SSWA, and Ms. Hanaa Singer-Hamdy, UN Resident Coordinator for Sri Lanka provided welcome remarks. Read more [here](#).
7. Sustainable Development Goals and the Role of the Parliament

Malé, Maldives, 30 October 2022. Organized by the ESCAP Subregional Office for South and South-West, in partnership with the Government of the Republic of the Maldives, the United Nations Resident Coordinator for the Maldives, United Nations Development Programme, and the International Parliamentary Union, the conference aimed to offer parliamentarians in the Maldives an overview of the 2030 Agenda for Sustainable Development and the 17 SDGs. SDG progress and challenges in the Asia-Pacific region and the Maldives were also discussed, with a focus on the role of the parliament in advancing the SDGs. Opening remarks were made by H.E. President Mohamed Nasheed MP, Speaker of the People’s Majlis; H.E. Ms. Armida Salsiah Alisjahbana, UN Under-Secretary-General & ESCAP Executive Secretary; H.E. Ms. Aishath Mohamed Didi, Minister, Ministry of Gender, Family and Social Services; H.E. Mr. Martin Chungong, Secretary General, Inter-Parliamentary Union; and Ms. Catherine Haswell, UN Resident Coordinator for the Maldives. Read more here.

8. Stakeholder Consultation for the Joint Programme on Strengthening National and Subregional Capacity for Sustainable Disaster Risk Reduction, Climate Change Adaptation and Mitigation in the Maldives

Malé, Maldives, 16-21 October 2022. ESCAP and UNDP are jointly implementing a two-year project to strengthen the integration of disaster risk reduction and climate change adaptation in the Maldives. As part of the project, the ESCAP Subregional Office for South and South-West Asia (ESCAP-SSWA) organized a series of stakeholder consultations facilitated by Ms. Leila Salarpour Goodarzi, Associate Economic Affairs Officer, ESCAP-SSWA, and attended by policymakers and experts from the National Disaster Management Authority; Maldives Meteorological Service; Ministry of National Planning, Housing & Infrastructure; Ministry of Environment, Climate Change and Technology; and the Special Envoy for Climate Change from The President’s Office. Read more here.

Hybrid mode, 30 September 2022. The ESCAP Subregional Office for South and South-West Asia (ESCAP-SSWA) and the ESCAP Transport Division jointly organized a policy dialogue that discussed subregional transport connectivity between Southern and Central Asia. Participating stakeholders explored key opportunities for sustaining and promoting regional transport connectivity initiatives and reforms of transport facilitation in the current scenario, as well as the scope and potential of transport connectivity in North and Central Asia, South and Southwest Asia and South-East Asia subregions. Opening remarks were made by Ms. Mikiko Tanaka, Head of Office, ESCAP-SSWA. Read more here
10. Online Training of Women Entrepreneurs on Leveraging Digital Infrastructure for Promoting Business through E-commerce and Digital Marketing

Virtual mode, 28 September 2022. The ESCAP Subregional Office for South and South-West Asia (ESCAP-SSWA) organized an online training of women entrepreneurs on leveraging digital infrastructure for promoting business through e-commerce and digital marketing for entrepreneurs from South Asia and Africa. This training helped connect entrepreneurs from both regions, thereby contributing to the transforming of regional value chains to inter-continental ones. More than 60 participants attended the training. Opening remarks were made by Dr Rajan Sudesh Ratna, Deputy Head and Senior Economic Affairs Officer, ESCAP-SSWA. A special address was made by the Rt. Hon. Patricia Scotland, Secretary-General of the Commonwealth Secretariat. Read more here.

11. Subregional Consultation: Mapping of social protection schemes and support services for and inclusion of persons with disabilities in South Asia

Virtual mode, 22 September 2022. The International Disability Alliance, the UNICEF Regional Office for South Asia (UNICEF-ROSA) and the ESCAP Subregional Office for South and South-West Asia (ESCAP-SSWA) organized a subregional consultation with representatives of organizations of persons with disabilities, to inform an ongoing mapping exercise of cash transfer programmes and publicly-funded support services for persons with disabilities in South Asia, jointly commissioned by UNICEF-ROSA and ESCAP-SSWA. Ms. Li Stephanie Choo, Social Affairs Officer, ESCAP-SSWA made opening remarks, alongside Ms. Jessica Owns, Regional Advisor for Social Policy, UNICEF-ROSA. Read more here.
12. Online Training of Women Entrepreneurs on Expanding Online Business through E-commerce Platform and Digital Marketing

Virtual mode, 16 September 2022. The ESCAP Subregional Office for South and South-West Asia, in collaboration with Enhanced Integrated Framework, Geneva, organized an online training to enhance the knowledge and capacity of women entrepreneurs to use e-commerce platforms to expand their business exports and participate in local, regional and global supply chains, in response to several requests received for capacity building on the subject. More than 160 women attended the event. Read more here.

13. Advancing Subregional Cooperation for Sustainable, Climate-smart and Integrated Management of Crop Residues

Hybrid mode, 15 September 2022. The ESCAP Subregional Office for South and South-West Asia (ESCAP-SSWA) and the Centre for Sustainable Agricultural Mechanization (CSAM) organized a meeting on Crop Residue Management in South Asia Advancing Subregional Cooperation for Sustainable, Climate-smart and Integrated Management of Crop Residues. ESCAP-SSWA and CSAM, in collaboration with its network of institutions, have carried out national studies for Bangladesh, India, Nepal and Pakistan to better understand the status of crop residue management in these countries, identify gaps and opportunities,
meeting saw the participation of more than 100 stakeholders, including government officials from agriculture and environment ministries/agencies from the subregion, experts from think tanks, academia and civil society organizations and representatives of interested UN Agencies, regional and subregional organizations. Read more here

Dhaka, Bangladesh, 6-8 September 2022. The ESCAP Subregional Office for South and South-West Asia (ESCAP-SSWA) organized a training for women entrepreneurs in Dhaka, Bangladesh, in partnership with the Government of Bangladesh; Enhanced Integrated Framework, Geneva; South Asia Network on the SDGs; South Asian Women Development Forum; Women Entrepreneur Association of Bangladesh; and Women & E-commerce, Bangladesh. This training was organized to equip women entrepreneurs from South Asia to use e-commerce and digital marketing platforms for enhanced access to supply chains as well as contribute towards the global economic development. Additionally, this training helped to establish a network amongst the women entrepreneurs by providing an opportunity to showcase their products, and services and share their entrepreneurial journey with an aim to inspire and motivate fellow women entrepreneurs. H.E. Mr. Mustafa Jabbar, Minister, Posts and Telecommunication Division, Government of Bangladesh gave the inaugural address for the event. This training was attended by about 100 participants from South-Asian countries. Read more here.

15. National Online Training Course for Women Entrepreneurs on use of IT and IT enabled Tools for Expanding Markets
The ESCAP Subregional Office for South and South-West Asia (ESCAP-SSWA) organized a training for women entrepreneurs in Bengaluru, India, in collaboration with UBUNTU, that was attended by more than 160 women entrepreneurs. This training was organized to enhance the knowledge and capacity of women entrepreneurs to use digital and online platforms for promoting business through e-commerce and creating awareness about the existing opportunities. Read more [here](#).

16. Annual Strategic Meeting of the South Asia Network on the Sustainable Development Goals (SANS)

Virtual mode, 28 July 2022. The ESCAP Subregional Office for South and South-West Asia (ESCAP-SSWA) organized a virtual brainstorming meeting of South Asia Network on the Sustainable Development Goals (SANS) member organizations on 28 July 2022. The session began with Ms. Mikiko Tanaka, Head of ESCAP-SSWA, introducing herself and highlighting steps taken towards the advancement of SANS. Dr. Rajan Sudesh Ratna, Deputy Head, ESCAP-SSWA then facilitated an introduction of two new SANS members, namely, the Institute for Studies in industrial Development, and the Consumer Unity and Trust Society International. Subsequently, the meeting discussed the theme for the Sixth South and South-West Asia Forum on the Sustainable Development Goals, to be held in Islamabad, Pakistan from 4-6 December 2022. The distinguished participants of the meeting included Prof. Nagesh Kumar, Director, Institute for Studies in Industrial Development; Dr. Fahmida Khatun, Executive Director, Centre for Policy Dialogue, Bangladesh; Ms. Sonam Pem, Executive Director, Tarayana Foundation Center, Bhutan; Dr. Sabyasachi Saha, Associate Professor, Research and Information System for Developing Countries; Ms. Dikshya Singh, Programme Coordinator, South Asia Watch on Trade, Economics & Environment; Dr. Dushni Weerakoon, Executive Director, Institute of Policy Studies, Sri Lanka; Professor Selim Raihan, Executive Director, South Asia Network on Economic Modeling; Dr. Arvind Kumar, President, India Water Foundation; Mr. George Cheriyian, Director, Consumer Unity and Trust Society International, and Mr. Junaid Zahid, Sustainable Development Policy Institute, Pakistan. Read more [here](#).
17. Training of Women Entrepreneurs on Leveraging Digital Infrastructure for Promoting Business through E-commerce and Digital Marketing

Bandos Island, Maldives, 6-9 June 2022. The ESCAP Subregional Office for South and South-West Asia (ESCAP-SSWA) organized a training in Bandos Island, Maldives, in partnership with the Commonwealth Secretariat, London, the Enhanced Integrated Framework, Geneva, the South Asia Network on the SDGs, and the Maldives Women’s Chamber of Commerce. H.E. Ms. Fathimath Niuma, Deputy Minister, Ministry of National Planning, Housing and Infrastructure, Maldives, gave the inaugural address. The second advanced hands-on training programme organized in physical form for ESCAP-SSWA since the COVID-19 pandemic, the training was attended by around 50 participants from Asia (6 South Asian countries) and Africa, many of whom had the opportunity to display their products during the networking sessions. The training involved sectoral discussions with leading experts and trade consultants who shared experiences on digitally diversifying their enterprises during the COVID-19 pandemic and discussed the recent innovations, trends and challenges encountered, and solutions adopted to overcome challenges created by the pandemic. The training also involved sessions on using online platforms to leverage digital infrastructure and become part of the global supply chain. There were dedicated hands-on sessions on registering and creating products and services catalogues and on uploading entrepreneur profiles on one-market platforms, including ESCAP’s training platform. Read more here.

18. Regional Policy Dialogue on Transforming the Logistics Sector

Hybrid mode, 31 May 2022. The ESCAP Subregional Office for South and South-West Asia (ESCAP-SSWA) and the ESCAP Transport Division, in collaboration with Asian Institute of Transport Development (AITD), organized a Regional Policy Dialogue on Transforming the Logistics Sector. The introductory remarks were given by Ms. Mikiko Tanaka, Director and Head, ESCAP

Hybrid mode, 31 May 2022. The Policy Dialogue provided a forum for discussion of the key messages of the 2022 edition of the Economic and Social Survey of Asia and the Pacific, ESCAP’s flagship publication. Ms. Mikiko Tanaka, Head, Subregional Office for South and South-West Asia, ESCAP, delivered the opening remarks and moderated the panel discussion. Mr. Michal M. Podolski, Economic Affairs Officer, Macroeconomic Policy and Financing for Development Division, ESCAP, gave the keynote presentation. Eminent panelists included Prof. Nagesh Kumar, Director, Institute for Studies in Industrial Development, New Delhi; Prof. Shaleen Singhal, Dean (Research and Relationships), TERI School of Advanced Studies, New Delhi; Prof. Shahid Ahmed, Professor, Department of Economics, Jamia Milia Islamia University, New Delhi; Dr. Fahmida Khatun, Executive Director, Centre for Policy Dialogue, Bangladesh; Prof. Selim Raihan, Executive Director, South Asian Network on Economic Modeling, Bangladesh; and Dr. Vaqar Ahmed, Joint Executive Director, Sustainable Development Policy Institute, Pakistan. Read more here.

20. 78th Commission Session 2022 Side Event – Asia-Pacific Riskscape@1.50C: Subregional pathways for Adaptation and Resilience

Bangkok, Thailand, 25 May 2022. Organized jointly by the Government of Maldives and ESCAP, the side event showcased various pathways to build systemic resilience to address multi-hazard risks in each ESCAP subregion. H.E. Mr. Collen Vixen Kelapile, President of The Economic and Social Council, and H.E. Ms. Armida Salsiah Alisjahbana, UN Under-Secretary-General & ESCAP Executive Secretary delivered the opening remarks, followed by a statement from H.E. Ms. Khadeeja Naseem, Minister of State for Environment, Climate Change and Technology, Maldives. The closing remarks were given by the Additional Secretary, Ministry of Foreign Affairs of Maldives. Read more here.
21. 78th Commission Session 2022 Side Event – Sustainable Graduation in the Challenging Situation: Perspectives from Bangladesh and the Region in light of the Doha Programme of Action (DPoA)

Bangkok, Thailand, 23 May 2022. The Government of Bangladesh, in association with ESCAP, hosted the strategic dialogue on the side lines of the 78th ESCAP Session for the Least Developed Countries group. H.E. Mr. Mohammed Abdul Hye, Ambassador and Permanent Representative of Bangladesh to ESCAP, gave the opening remarks, followed by statements and presentations by H.E. Mr. Collen Vixen Kelapile, President of the Economic and Social Council; H.E. Ms. Sharifa Khan, Member (Secretary), Planning Commission of Bangladesh; and H.E. Ms. Armida Salsiah Alisjahbana, UN Under-Secretary-General & ESCAP Executive Secretary. The panel discussion, moderated by Ms. Rupa Chanda, Director, Trade, Investment, and Innovation Division, ESCAP, consisted of Dr. Biswo Nath Poudel, Vice-Chairman, National Planning Commission, Singha Durbar, Kathmandu, Nepal; Mr. Kim Veara, Deputy Secretary-General, National Committee for ESCAP, Royal Government of Cambodia; Mr. Olivier Cattaneo, Head of Policy Analysis and Strategy Unit, Organization for Economic Co-operation and Development; Mr. Rolf Traeger, Chief of the Least Developed Countries Section, United Nations Conference on Trade and Development; Mr. Maurizio Cian, Head of Cooperation, European Union in Bangladesh; and Mr. Jayendu De, International Monetary Fund Country Representative in Bangladesh. The closing remarks were delivered by Ms. Fatima Yasmin, Permanent Secretary, Economic Relations Division, Ministry of Finance Bangladesh, who also chaired the event. Read more here.

22. Thirteenth South Asia Economic Summit: Session on Trade Cooperation and Localizing Value Chains

Hybrid mode, 20 April 2022. The Subregional Office for South and South-West Asia (ESCAP-SSWA) co-sponsored the plenary session “Trade Cooperation and Localizing Value Chains” on Day 2 of the Thirteenth South Asia Economic Summit, which was organized by ESCAP’s SANS member, the Research and Information System for Developing Countries (RIS), India. The session was chaired by Mr. Rajeev Kher, Distinguished Fellow, RIS, and co-chaired by Dr. Rajan Sudeep Ratnai, Deputy Head and Senior Economic Affairs Officer, ESCAP-SSWA. Eminent panelists included Professor Mustafizur Rahman, Distinguished Fellow, Centre for Policy Dialogue, Bangladesh; Professor S K Mohanty, RIS; Professor Bishwambher Pyakuryal, Chairman, Institute for Strategic and Socio-Economic Research, Nepal; Professor Nisha Taneja, Project-in-Charge, Indian Council for Research on International Economic Relations, New Delhi; Dr. Ganesan Wignaraja, Executive Director, Lakshman Kadirgamar Institute of International Relations and Strategic Studies, Sri Lanka; and Dr. Pritam Banerjee, Logistics Specialist Consultant, Asian Development Bank, New Delhi. Their discussion explored the way forward in creating new value chains, addressing non-tariff measures, reduction in trade costs and competitiveness with special reference to MSMEs, and promoting
II. Select Outreach Activities

1. Reimagine and Reconnect: Indo-Pacific Synergies Through the Lens of Culture

Kolkata, India, 21-22 November 2022. Asian Confluence, in collaboration with the US Consulate in Kolkata, organised a series of discussions with a unique approach to Indo-Pacific dialogues that will leverage culture as a tool to trigger policy discussions, to help promote a free, open, and inclusive Indo-Pacific region. The conclave was designed with an interweaving of dialogues and conversations with performances, installations, and film screenings to create an interface that will allow participants to look, feel and touch beyond the usual spaces that policymakers engage with. Ms. Leila Salarpour Goodarzi of the ESCAP Subregional Office for South and South-West Asia spoke at the event, along with representatives from the Governments of Bangladesh, Bhutan, India, Japan, Nepal and the USA, as well as Asian Confluence and stakeholders from academia and think tanks. Read more here.

2. High Level Policy Dialogue on Accelerating SDG 6 Through Multi-stakeholder Partnerships
Ratna, Deputy Head, ESCAP Subregional Office for South and South-West Asia, participated on the panel alongside the Minister of Jal Shakti and State Minister for Agriculture, Government of India, representatives from UNEP, India Water Foundation, and World Water Council.

3. Webinar and Release of the Report on Digital Financial Inclusion of Women in MSMEs: G20 and India

Virtual mode, (India) 23 September 2022. Dr. Rajan Sudesh Ratna, Deputy Head and Senior Economic Affairs Officer, ESCAP Subregional Office for South and South-West Asia, participated in a panel discussion ‘Digital Financial Inclusion and Women Empowerment’ at the webinar and release of the report “Digital Financial Inclusion of Women in MSME’s: G20 and India”, organized by the Indian Council for Research on International Economic Relations (ICRIER). The report was jointly published by ICRIER and the National Bank for Agriculture and Rural Development, and authored by Dr. Souvik Dutta, Dr. Arpita Mukherjee, Ms. Eshana Mukherjee, and Ms. Srishti Pal. Read more here.
4. International Federation of Training and Development Organizations (IFTDO) 49th International Conference and Exhibitions

New Delhi, India 21 May 2022. Dr. Rajan Sudesh Ratna, Deputy Head and Senior Economic Affairs Officer, ESCAP Subregional Office for South and South-West Asia, participated in IFTDO’s 49th International Conference and Exhibition as a speaker in the session ‘Getting Tangible About Intangibles’, moderated by Mr. Ashish Kaul, Director (Knowledge and Advisory & Business Head), PSE Business, Society for Human Resource Management (SHRM) India. The panelists, including Dr. Alexander Alonso, Chief Knowledge Officer, SHRM, and Dr. Sanjay Kumar, Director-Personnel, Western Coalfield Ltd., discussed how investment in intangible assets could breathe new life into productivity growth.

IV. COUNTRIES OF SOUTH AND SOUTH-WEST ASIA AT THE GENERAL DEBATE OF THE 77th SESSION OF THE UNITED NATIONS GENERAL ASSEMBLY 2022

Disclaimer: The following summaries do not represent the full speeches made by the representatives. To read the full version of each speech, please refer to the links below.

Bangladesh

Mr. Mohammad Masud Rana Chowdhury, Joint Secretary, Economic Relations Division, Ministry of Finance, Government of Bangladesh, noted that Bangladesh had submitted its first and second VNRs in 2017 and 2020, respectively. Poverty in Bangladesh has declined from 40% in 2005 to 20.5% in 2019 and life expectancy at birth has increased from 65 to 72.6 years within the same period. The VNR process helped Bangladesh to identify some of the key challenges for achieving the Goals. Reducing income inequality, reducing the absolute number of poor people, ensuring food security, ensuring universal health coverage and ensuring quality education at multilevel educational streams, inadequate infrastructure to meet the demand of urban amenities, facilities, primary healthcare, wastewater treatment, collection and disposal of urban solid waste, transportation services, still remain as areas of concern. As a climatically vulnerable country, Bangladesh needs to reduce its exposure to the climate change impacts by applying adaptation and mitigation measures, which will be challenging. In addition, increasing domestic resource mobilisation, particularly increasing the tax to GDP ratio at the desired level, will be challenging. Bangladesh has incorporated strategies into its Eighth Five-Year Plan to overcome COVID-19 challenges. Following the guidelines of Prime Minister Sheikh Hasina, the government undertook a comprehensive economic recovery program containing 28 fiscal and stimulus packages worth around US$ 22.08 billion to facilitate the implementation of these strategies. In closing, it was felt that international cooperation, multilateralism, and international solidarity is the best way for the world to effectively overcome and recover from COVID-19 pandemic, prevent future pandemics, and address urgent global challenges.

Bhutan

Mr. Phurba, Senior Planning Officer, Office of the Cabinet Affairs and Strategic Coordination, Strategic Planning Division, Government of Bhutan, began by highlighting that, the guiding development philosophy of Bhutan is Gross National Happiness (GNH), which is tied to a harmonised balance between the material well-being that is being pursued and also the spiritual, emotional, and cultural needs of their society. The Sustainable Development Goals are a universal call to action to end poverty, protect the planet, and ensure that by 2030 all people enjoy peace and prosperity. As such, there is a strong alignment between the GNH, and SDGs and the ongoing Twelfth Five-Year Plan (2018-2023). Bhutan first carried out its VNR in 2018 and a second round was conducted in 2021. The second round of the VNR took place during the peak of COVID-19; nevertheless, efforts were made to make the process as participatory and inclusive as possible. Around 65 agencies, including the private sector, CSOs and academia, were engaged, which greatly improved participation compared to the first VNR exercise. Bhutan had an in-depth analysis of the Goals that were the thematic areas for the 2021 HLPF and also analysed the impact of COVID-19 and key learnings from how the country responded to the pandemic during that time. An effort was made to also analyse the goals that were not included in the 2021 HLPF thematic areas. The current Twelfth Five Year Plan has 17 national key result areas closely aligned to the 17 SDGs, and the report in 2021 found broad-based progress in all SDGs. As a result of the success over the past few decades, Bhutan is due to graduate from the LDC category by the end of 2023. The COVID-19 pandemic has had immediate effects on many SDGs, especially on livelihoods, education, and mental well-being, in addition to the revenue and economy of the country. While all Goals, except SDG 17, were assessed to be on track during the 2018 VNR, it was likely that the progress of SDGs 1, 4, 8, 10, and 17 were “at risk” during the 2021 VNR. Due to the COVID restrictions, Bhutan sealed its international borders in March 2020 and reopened only after two and a half years. At that point, the economy recorded a growth rate of -10%, which was a 15% drop compared to the previous year. This was a historic low for Bhutan in recent history. Except for the agriculture and hydropower sector, all other sectors experienced negative growth during that year because of COVID. Many people were also displaced from their jobs; unemployment rates also increased compared to the previous year to the highest level of 5% in 2020. To minimise the impact of COVID, many actions were taken such as switching to online education and a Welfare Scheme under His Majesty’s Relief Kidu which ensured that around 37,000 people from the most vulnerable population, including children, were supported with minimum income, cash transfers, loan deferrals, and interest payments by the government until June 2022. Bhutan is currently conducting the Living Standards Survey, which is expected to be completed in 2023. The Survey results will allow for the quantification of the positive impacts of Bhutan’s measures taken over the last couple of years. Bhutan highlighted that the VNR and international forums have helped deepen societal awareness and strengthen ownership of the Goals. Bhutan sees the VNRs as an opportunity to understand how the country is progressing in implementing the Goals as well as their alignment with Bhutan’s national programmes. VNRs serve as
India

Dr. Sabyasachi Saha, Research and Information System for Developing Countries, India, started his intervention with a discussion on the G20 and the importance of the youth. India has taken up the presidency of the G20 starting in December, and in order to draw more attention to the youth of the region, 75 universities across the country will be connected; over the next few months several G20 related events would take place across the country to mainstream the role of the youth and students in the process. India has proposed to place accelerating the Goals as a key priority area for the G20 next year, focusing on the large-scale transformations taking place and the use of digital and other forms of technologies. There will also be a focus on women-led development and green transition. India has called for a strong focus on climate action and climate justice which is also a concern in South Asia. India is taking the lead in setting the agenda on climate finance and adaptation beyond the normal mitigation narrative. India presented its first VNR in 2017 and its second in 2020. The first VNR was mostly around reporting on the status of the various indicators and what India was doing in its national initiatives, but a key focus was also on bringing in sub-national initiatives in the form of cooperative federalism. Indian states also took the lead in coming up with their SDG vision document and these were reflected in the first VNR. The VNR 2020 was still a process of assessing what has happened in terms of goals, targets and indicators, but more focus was placed on what can be done in terms of localisation. The framework for the localisation of SDGs was more clearly identified in the second VNR and some new policies corresponding to that were put in action in different levels. As SDG 17 is a cross-cutting Goal, countries have to pay more attention to what is required and what is done in the region in terms of strengthening systems and capacities as part of delivering SDG 17.

Islamic Republic of Iran

Dr. Ali Gholampour, Head, Department of Development Issues, Ministry of Foreign Affairs, Government of the Islamic Republic of Iran, noted that during the negotiation and adoption process of the 2030 Agenda for Sustainable Development at the General Assembly, the country had raised concerns on some parts of the Agenda that conflicted with national priorities or national policies, including Sharia rules and regulations, and stated that it would not be affiliated to such parts of the SDGs. A first VNR had been prepared in 2018 but not presented at the HLPF due to some sensitivities in Iran regarding parts of the Agenda where the government had reservations. However, Iran plans to prepare and submit a VNR in 2024. Iran has made some progress in the SDGs, but international sanctions have made it extremely difficult to gain access to necessary financing and technologies to support SDG achievement. Iran has thus had to rely on its own domestic resources to work towards the achievement of the SDGs. During the early days of the COVID-19 pandemic, Iran was unable to pay for vaccines due to sanctions on international financial transactions but managed to initially import vaccines through UN agencies. Since then, Iran has developed its own COVID-19 vaccines. With regard to social development aspects of SDGs, it was mentioned that in the field of education, the percentage of women in the universities is more than males. All rural and urban areas are covered by schools and infrastructure has been developed so that everybody can have to the internet.

Maldives

Ms. Fathimath Shazly, Senior Planning Analyst, Ministry of National Planning, Housing and Infrastructure, Government of Maldives, noted that out of 17 goals, Maldives has achieved SDG 1 (No poverty) and SDG 4 (Quality education) while having major challenges with goal 2 (Zero hunger), 5 (Gender equality) and 14 (Life below water). Much still needs to be done in the areas of gender equality, climate action and environment sustainability and access to timely data is needed to make effective policy decisions. While moderately improving, eight goals still have significant challenges and Goal 15 reported a decreasing trend, as it was in 2021. Maldives conducted its first VNR in 2017 and work is ongoing for submission of a second VNR in 2023. For the first time an Economic Census has been carried out together with the Population Census and this is expected to provide a very robust data set for the VNR analysis. A third of Maldives’ population is identified of being dimensionally poor and COVID-19 has also affected the food security situation in the country with its heavy reliance on food imports. Efforts are being made to strengthen local food production, supply and distribution chains in order to reduce food wastage. Increases in sexual exploitation and abuse, gender-based violence, mental health issues and non-covid health issues are also being seen. In order to reduce disparities that exist in access to safe drinking water and sanitation between Malé City and the outer islands, efforts are being made to improve water and sewerage systems in the outer islands. COVID-19 has accelerated the use of digital technologies for the provision of various services. ICT also offers solutions to bridge the geographic divide between islands and bring services closer to people. However, a lot of inequalities have been created in acquiring affordable internet and the ability to use digital technologies differ between knowledge workers and manual workers. Maldives has developed a National Strategy
made to work with the stakeholders to formulate mechanisms to collect the missing data. Improving connectivity of Maldivian citizens to the country’s economy, infrastructure and social services has started with the development of an Integrated National Public Ferry Network. Once completed, the existence of an efficient, reliable, convenient and sustainable national ferry network will help to develop the economy. The government is also focusing on diversifying the economy; creating job opportunities and re-integrating the redundant workforce back into the labour force and support the MSMEs and providing fiscal stimulus through a National Resilient and Recovery Plan.

Nepal

Mr. Kewal Prasad Bhandari, Secretary, National Planning Commission, Government of Nepal, provided a brief overview of the various steps the country has taken to integrate the Goals into national development planning processes. Nepal’s first VNR was submitted in 2017, a second VNR in 2020 and a third VNR will be prepared for the HLPF in 2023. Initially Nepal had prepared 479 indicators to measure progress on SDGs, but this has now been reduced to 300 indicators due to difficulties in data availability. The Fifteenth Plan (2019-2024) has been aligned with the SDGs and planning guidelines have been developed to facilitate SDG localisation. A medium-term expenditure framework incorporating SDGs for all ministries and departments as well as a national evaluation action plan for evaluating SDGs have also been prepared. Localisation of SDGs has been challenging as newly elected officials at the local, provincial and federal levels of government need to be oriented on the SDGs. Weaknesses exist in available databases and efforts are being made to improve the situation. Funding for SDGs is shared between government (54.7%), private sector (36.6%), households (4.4%), and cooperatives/NGOs (4.3%). However, there remains an annual financing gap of NPR 585 million and the need to mobilise funding is a major challenge.

Pakistan

Mr. M. Ali Kemal, Chief SDGs, SDG Support Unit, Ministry of Planning Development and Special Initiatives, Government of Pakistan, noted that their first VNR and second VNRs were presented in 2019 and 2022, respectively. It was emphasised that Pakistan views the Goals as a national obligation and has established a parliamentary task force and other acting bodies such as SDG support units at the provincial level. The National Economic Forum, headed by the Prime Minister of Pakistan and attended by all the chief ministers, have sub-committees, which provide guidance on what to do and how to move forward as far as the SDGs are concerned. Mr Kemal explained that Pakistan has also developed a framework and integration priorities, completed in 2018, with 42 leverage points connected to all 169 targets. If Pakistan engages in these 42 leverage points, it will achieve most of the targets included in the 17 SDGs. He also discussed on a SDGs Achievement Programme, a cabinet programme carried out through the members of national and provincial assemblies. While the programme does not have much funding, it is a demand-driven project at the local level covering water and sanitation, health, education, and electricity. In Pakistan, the main focus of the 2022 VNR were the COVID-19 strategies that were developed to overcome pandemic-related problems. Even though Pakistan had 31,000 deaths during COVID-19, it recovered very quickly from the COVID-19 crisis. Regarding some of the other Goals, Pakistan reduced its maternal mortality rate (MMR) from 276 in 2006-2007 to 186 in 2018-2019 and poverty was reduced by 2.4%. A key lesson learned from the VNRs were that issues such as inclusivity and equity were key to ensure sustainability. It was noted that during COVID-19, developed countries were assisting developing countries, but this support has disappeared after the Ukrainian-Russia conflict which has created a new super shock of high inflation and a balance of payment crisis. Pakistan initiated a series of reforms in August 2022 to turn around social and economic threats facing the country. Green financing, debt swaps, green bonds and various social bonds, even gender bonds and climate bonds, are areas that need to be explored by Pakistan. Despite efforts made to report on all targets, 50 indicators are left unreported and needs to be resolved. In closing, participation in the HLPF was felt to be useful as it provided an opportunity to interact and receive feedback from other countries.

Sri Lanka

Prof. Hemanthi Ranasinghe, Member, Sustainable Development Council, Government of Sri Lanka, carried out its first and second VNRs in 2018 and 2022, which encompassed almost all the sectors and all the Goals. The COVID-19 pandemic and the Easter attacks in 2019, which took place between the two VNRs, greatly damaged the tourism industry. The country is also still struggling with the recent financial crisis that has affected the economy and devalued their currency. The importance of partnerships in leveraging innovations and strategic joint ventures to untap potential international markets were emphasised. Issues related to transportation were also discussed, including the long waiting time that exists for the transfer of goods between countries such as Bangladesh, India and Pakistan despite being on the same continent. In 2021, Sri Lanka was ranked 95th among 132 countries in the global innovation index of the World Intellectual Property Organization. Sri Lanka's
impacted by the crisis. Unlike many large industries, it is harder for these MSMEs to return to where they were. Some new policy frameworks have been introduced to promote high-potential SMEs and improve their business opportunities. National vocational training programmes have also been started to support improvements in the technical skills of these companies. It was also noted that the SDG goals are multi-dimensional and the country's policies have to align with them to provide a successful transformation into a blue-green economy that addresses the sustainable management of land and ocean resources. Sri Lanka has submitted its Nationally Determined Contributions (NDCs) which includes nine adaptation sectors and five mitigation sectors. Sri Lanka has pledged to become net zero in carbon emissions by 2050, and for renewable energy share to be 70% by 2030. Even though achieving these targets does not seem possible, Sri Lanka hopes to increase its renewable energy share. There are many plans in action, such as increasing the share of renewable energy in electricity generation, improvement of public transport systems, promoting e-mobility, introducing carbon pricing instruments, introducing policies for increasing parking fees, improving asset management and also promoting online and work from home to reduce emissions and save the environment. In Sri Lanka, access to safe drinking water is 89%, and safe sanitation is 97%. Sri Lanka promotes climate-resilient integrated water management to strengthen climate resilience in communities, and SDG 13 is in action in the country's national policies and programmes. An investor map has been prepared, which tries to enhance the operationalisation of the Goals in the country as well as with the neighbours. It was hoped that through the strengthening of partnerships and fostering of international cooperation that Sri Lanka's recovery could be accelerated and achieve the country's vision for an inclusive, transformative nation through the realisation of the 2030 Agenda.

Türkiye

Mr. Veysel Sarici, Expert, Strategy and Budget Office, Presidency of Türkiye, Government of Türkiye, noted that they conducted VNRs in 2016 and 2019 and the next VNR is planned for 2024. The SDGs have been integrated into national long-term development plans, annual programmes, annual investment programmes and sectoral action plans. To monitor the implementation of the SDGs, 131 indicators have been identified out of 231 unique SDG indicators and these have been annually published by the National Statistical Institute. For Türkiye, Goals 1 and 10 are considered to be important as they aim to end poverty and inequality across the country. Various measures have been taken to address these Goals, including the implementation of support systems for children and people with special needs. Türkiye has also made significant progress on SDG 9 (industry, innovation and infrastructure). SMSE-oriented industrial policies have been developed that include the implementation of support systems for children and people with special needs. Türkiye has also made significant progress on SDG 9 (industry, innovation and infrastructure). Research and development in the field of health should be strengthened by developing primary health and mental health services. It is felt that people with income below a certain level should be provided with free primary health care services. Research and development in the field of health should be strengthened by developing production capacity for technology-based products such as vaccines, drugs, medical equipment and devices. The TURKOVAC vaccine for COVID-19 was developed by Turkish scientists and sent to many countries in Africa to strengthen global partnerships and fostering of international cooperation that Sri Lanka's recovery could be accelerated and achieve the country's vision for an inclusive, transformative nation through the realisation of the 2030 Agenda.
