

Trade for LDC development

# EIF Phase Two Logframe

EIF supports LDCs to increase  
their share of global trade

Enhanced Integrated Framework

Trade for LDC development

**Submit final project proposal to EIF for support**

**Finalise project proposal with guidance from technical experts and ES**

**Share draft proposal document with ES and TFM**

**Expand the logframe into a full project proposal**

**Develop the logframe the- project backbone**

**Develop project concept**

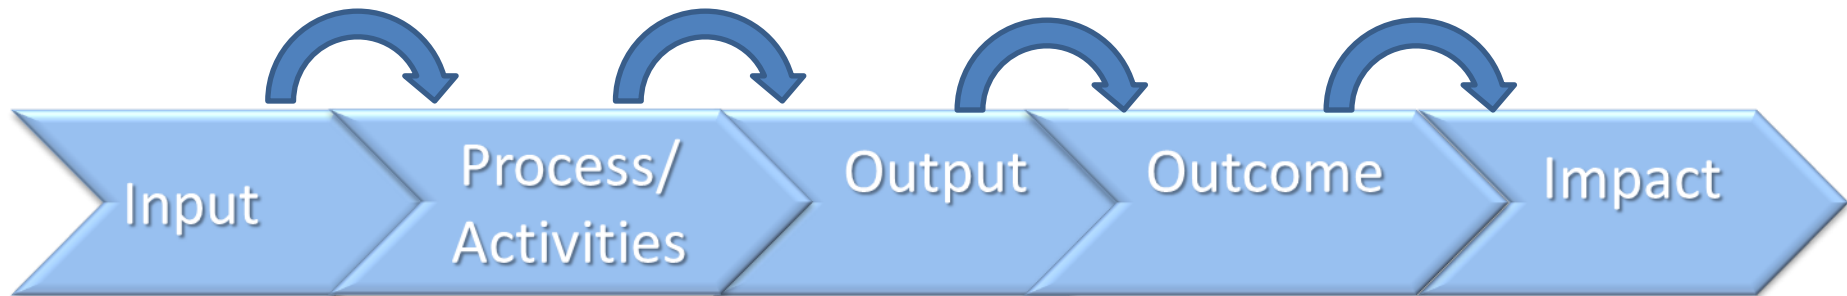

**Engage Stakeholders**

Enhanced Integrated Framework

Trade for LDC development

## Phase Two Results Framework/Logframe

# EIF Phase Two Logframe

- The EIF is delivered through projects at country level;
- Project level interventions enable management to account for programme-level results;
- This requires *coherence* between:
  - ❑ what happens at the project level in countries; and
  - ❑ the results to be delivered at the programme level.

## Phase Two Logframe

### Phase One **Impact** level Indicators

- LDC Members accession to the WTO.
- **Per cent share of international non-oil trade from LDCs.**
- Poverty head count.
- Per capita growth rate.
- Gini-coefficient.

### Phase Two **Impact** level Indicators

- **EIF supported country's share of non-oil global exports.**
- **Value of trade from EIF supported country.**
- AfT flows to EIF supported country.
- Foreign Direct Investment (FDI) in EIF supported country.

## Phase Two Logframe

### Phase One OUTCOMES (4)

- Institutional management capacity building;
- Trade mainstreaming;
- Coordination of trade related resources;
- Resource leveraging in support of the DTISAM.

### Phase Two OUTCOMES (2)

- EIF supported country own a trade agenda conducive to sustainable **pro-poor growth**.
- EIF supported country **increases** its presence in international markets.

## Outcome and indicators

- Phase one had **4** outcomes with a total of **19** indicators
- Phase Two has **2** outcomes with a total number of **5** indicators;
- Note that some Outcome indicators have **moved down to the output level**;
- Note that there were **no assigned output level indicators in Phase one**.

## Outputs and indicators

Output :

- capital goods and services that result from EIF direct intervention e.g. No. of workshops delivered.
- Phase Two logframe has 6 outputs and 18 associated indicators.

## Phase Two Logframe-summary

- In Phase Two we have complete logframe:
  - ❑ Impact (and associated indicators).
  - ❑ Outcomes (and associated indicators).
  - ❑ Outputs (and associated indicators).
- In summary we have **two outcomes** (replacing four) and 5 associated indicators.
- Added **6 Outputs** and 18 associated indicators

## Phase Two Logframe-summary

- In Phase Two we have complete logframe:
  - ❑ Impact (and associated indicators).
  - ❑ Outcomes (and associated indicators).
  - ❑ Outputs (and associated indicators).
- In summary we have **two outcomes** (replacing four) and 5 associated indicators.
- Added **6 Outputs** and 18 associated indicators

## EIF's recognized International MANDATE

➤ ***Goal 8 has a direct reference to the EIF and AfT, as Target 8.A states:***

*“Increase Aid for Trade support for developing countries, in particular least developed countries, including through the **Enhanced Integrated Framework** for Trade-related Technical Assistance **to Least Developed Countries**.”*

## The EIF Targets are aligned with the SDG

- ***The goal of the EIF (impact indicator 1) is aligned with SDG Target 17.11, which states:***

*"Significantly increase the exports of developing countries, in particular with a view to doubling the least developed countries' share of global exports by 2020."*

## The EIF Targets are aligned with the SDGs

- EIF recognizes that global trade will play a crucial role in the implementation of the Sustainable Development Goals as trade is directly related to **11 Targets under 9 Goals.**

Impact & Outcome 2  
output 2

Outcome 2  
outputs 1

EIF as a  
Partnership

Also SDG 11.17 equates to EIF Outcome 2 & Impact1  
increase significantly the exports of developing  
countries, in particular with a view to doubling the  
LDC share of global exports by 2020.

## Risk Management in EIF Phase Two

- For EIF Phase Two Risk Management will be of special focus and therefore part of the whole project cycle;
- Each project submitted to the EIF should have a Risk management plan;
- Risk should be periodically assessed, updated and reported;

## Risk Management in EIF Phase Two

- Project management should understand risk and determine the acceptable level of risk?
- The programme level logframe contains a detailed analysis of risks and assumptions related to expected project results.
- The table shows a sample of risks that could influence the achievement of expected results at country level and the recommended mitigation measures.
- These Matrices (the programme level risks and the sample of country level risks) should be adapted to country situation in preparing proposal, updated and reported periodically.

## Phase Two : Quality at Entry (Q@E)

- To better track progress on the essential dimensions of institutional and operational effectiveness, the EIF Phase Two Results Framework will:
  - assess project quality at preparation in order to determine project readiness to enter into the phase of approval and initial implementation (phase of entering into force).
- Q@E is a necessary element of project design and a prime determinant of successful project delivery, since deficiencies in design are difficult to correct during implementation.

## Phase Two : Quality at Entry (Q@E)

- While Q@E is an important determinant of successful project outcomes, effective supervision is also required to ensure the delivery of results.
  - The Q@E document (as shown) is the foundation on which projects submitted to the EIF will be assessed;
  - The analysis signifies and emphasizes a shift from a 'process approach' to a 'thorough analysis and careful project design' at the outset;

## Phase Two : Quality at Entry (Q@E)

- The Q@E table shows how the issues will be assessed which provides actionable procedures related to strengthening of project development effectiveness and the results focus of the EIF.
- The checklist will be provided to countries to use in preparing a proposals

## Phase Two : Results Reporting

- Same as phase but streamline
- For Phase Two, Semi annual report will look at activities implementation progress over planned in a streamlined format based on output level indicators and some outcome indicators.
- Annual report will continue but again streamlined to focus more on progress on achieving targets of output and outcome level indicator.
- These formats will be circulated to countries but will be automated in the MIS in 2017.

## Phase Two : Practical session

- Shift from Phase one to Phase Two Logframe
- Countries identify gaps in their current logframe against the Phase Two logframe .
