How to raise awareness and strengthening partnership?: All Stakeholders have roles to play for the SDGs

Policy integration

SDGs help us think about development in new and more comprehensive ways

=> All SDGs are connected to each other

SDGs are both sectoral and cross-sectoral:

- Ensure policy coherence across different sectors
- Take into account interdependences between sectors
- Complement sectoral policies with an inter-sectoral dimension

Generating Indicators for Implementation and M&E

- Work on SDG Indicators to be produced from national sources
 - ⇒ See specific list of indicators provided for this Workshop
- Study definitions provided by metadata
 - ⇒ Assess if national data follow metadata definitions and methodologies
 - ⇒ Discuss how to adapt national methodologies to reach metadata definitions
- Enquire recommended data sources to compile indicators
 - ⇒ Is the necessary raw data for this indicator currently collected, and from what data source?
 - ⇒ Is the indicator (or similar indicator) currently calculated?
 - ⇒ Administrative data; Surveys: DHS, LFS, MPLCS, Census
- Fill-in the reporting form with the results of the group work

Compilation of SDG Indicators

- Source data is collected in each country
 - Indicators are computed at national level by:
 - Myanmar Government Departments
 - International agencies, as part of their regular activities
- ⇒ *Very important to provide Myanmar national data to international agencies!*

SDG Indicators are a basis for the development of national data collections

- Align and harmonise national statistical system with international standards
- Develop regular standard data collections
- Produce data for the monitoring of SDG Targets
