

Risk Measurement Exercise

Form groups and discuss:

What are the current *geospatial datasets* available
in your government as inputs for risk measurement

Make a list of datasets, note their sources, and classify:

E.g.:	Input data	Source
Hazard exposure	<i>DEM</i>	<i>Mapping agency</i>
Vulnerability	<i>Household income</i>	<i>Household Income-Expenditure Survey</i>
Coping Capacity	<i>Locations for disaster alarm system</i>	<i>DMA administrative records</i>
