Protection of personal data

In January 2012, the European Commission proposed a comprehensive **reform of data protection rules in the EU**.  
On 4 May 2016, the official texts of the Regulation and the Directive have been published in the EU Official Journal in all the official languages. While the **Regulation** will enter into force on 24 May 2016, it shall apply from **25 May 2018**. The **Directive** enters into force on 5 May 2016 and EU Member States have to transpose it into their national law by **6 May 2018**.  
The objective of this new set of rules is to give citizens back control over of their personal data, and to simplify the regulatory environment for business. The data protection reform is a key enabler of the Digital Single Market which the Commission has prioritised. The reform will allow European citizens and businesses to fully benefit from the digital economy.

Take control of your personal data

## Securing Europe's Information Society

### Topics

In 2017 ENISA continues to work on Cyber Exercises, cooperation with CSIRTs, the cyber threat report, data protection and privacy, the ECSM, and others. It also contributes to the implementation of the NIS Directive, addressing topics like security requirements, incident notification and standardisation.

Work Programme 2017

### What we do

ENISA provides recommendations on cybersecurity, supports policy development and its implementation, and collaborates with operational teams throughout Europe.

More about ENISA

### Mission

ENISA contributes to securing Europe's information society by raising awareness and by developing and promoting a culture of network and information security in society thus contributing to the proper functioning of the internal market.

ENISA Strategy 2016-2020
