

Way Forward

- Purpose of the training is to build technical capacity of high risk disaster countries to produce and use statistics to support national disaster risk reduction strategies in respective countries
- Apply DRSF to support coordination collaboration between ministries and data providers
- Follow-up activities with more specific focus is a possibility

Way Forward

- Materials for the DRSF will be improved based on the feedback from participants and resource persons
- Development of e-learning platform of DRSF will be included in another component

Way Forward

- ESCAP welcomes Indonesia to conduct localized training on disaster related statistics for its own use
- Indonesia is ready to contribute its experience and expertise on disaster related statistics in the regional and global cooperation activities
- Link Indonesia with regional and global disaster-related statistics initiatives
