In 2016, Vietnam has enacted a Law on Information Security. This Law prescribes the operation of information security, the rights and responsibilities of agencies, organizations and individuals in ensuring the safety of information on the network; Civil code; Standards, technical regulations on network information security; Business in the field of information security; Human resources development, information security network; State management of information security.

In addition, the Ministry of Public Security of Vietnam is also assigned by the Government to develop a Law on Cyber Security. In the coming time, this law will be submitted to the National Assembly and is expected to be promulgated in 2018.

10. What Vietnam needs to support in the coming time

The Members of APTFF need to cooperate in order to create advantageous circumstances for electronic commerce development on the basis of mutual benefits in the areas including, but not limited to those mentioned below:

- i. The Members of APTFF will explore possible ways of cooperation such as joint studies, sharing experiences in policy making and government management in e-commerce, IT, cyber security;
- ii. There should be a mechanism to coordinate and share information on information security among APTFF members, encouraging enterprises to participate in the field of information security.;
- iii. The Members of APTFF support Vietnam in the training of high quality human resources in the areas of electronic commerce, information technology, cyber security
