This report analyses Sustainable Development Goals (SDGs) trends as well as data availability for monitoring progress in Asia and the Pacific and its five subregions. It assesses progress towards the SDGs and the gaps which must be closed for these to be achieved by 2030. This assessment is designed to ensure the region's actions remain on target, shortcomings are addressed as they arise, and all interested parties remain engaged. It is an invaluable resource for all stakeholders involved in prioritisation, planning, implementation and follow-up of the 2030 Agenda for Sustainable Development in Asia and the Pacific.
