As we talked about disability inclusive SDGs, disability is one of the important part of SDGs. ROK has been supporting the Asian and Pacific Decade of persons with disability 2013-2022 and Incheon Strategy with 62 indicators for persons with disabilities.

I would like to express our deepest gratitude to ESCAP Secretariat to implement the project.

As we are facing the midterm review of Incheon Strategy in 2017, ROK would like to ask member states to pay attention to establish reliable and comparable baseline data on the Incheon Strategy indicators for the successful implementation of this meaningful regional framework of disability.

And for coherent, efficient and inclusive follow-up and review for the 2030 agenda, ROK is one of the countries of voluntary national reviews by High-level political forum on SDGs. Through this review, ROK aims to enhance our national policies and institutional frameworks and mobilize necessary support and partnership for the implementation of SDGs. ROK also expects our experience in voluntary national review could support other member states in Asia and the Pacific region for implementation of SDGs.
