

FAO - Statement Item 2

FAO is gearing up to support country effort to make data available on those 21 indicators for which FAO is the custodian. In term of FAO effort, we are working in 3 areas. 1) work in developing methodologies for GFC indicators 2) Training of the country and 3) establishing a database for SDGs indicators.

It's very important to consider the dissemination aspect of the SDG indicators and avoid duplication on our effort. FAO is effectively collaborating with ESCAP in all matters to make the regional level SDG report are as expected.
