

Agenda Item 3(e) IRAN

Thank you chair.

FAO has been appointed as a main authority for implementing several SDG indicators (20 out of 230).

So FAO will perform some functions such as:

A) Contribute to capacity building to collect relevant data.

B) preparing annual global report for international community.

In this regard capacity building would be particularly important for Asia-Pacific region, especially for least developed countries, and I also suggest that make a ranking among the countries in the region and then fill the gap by using developed countries. Iran is ready to share its experiences.
