Figure 11.14: Tele density per 100 people, 2013- 2018

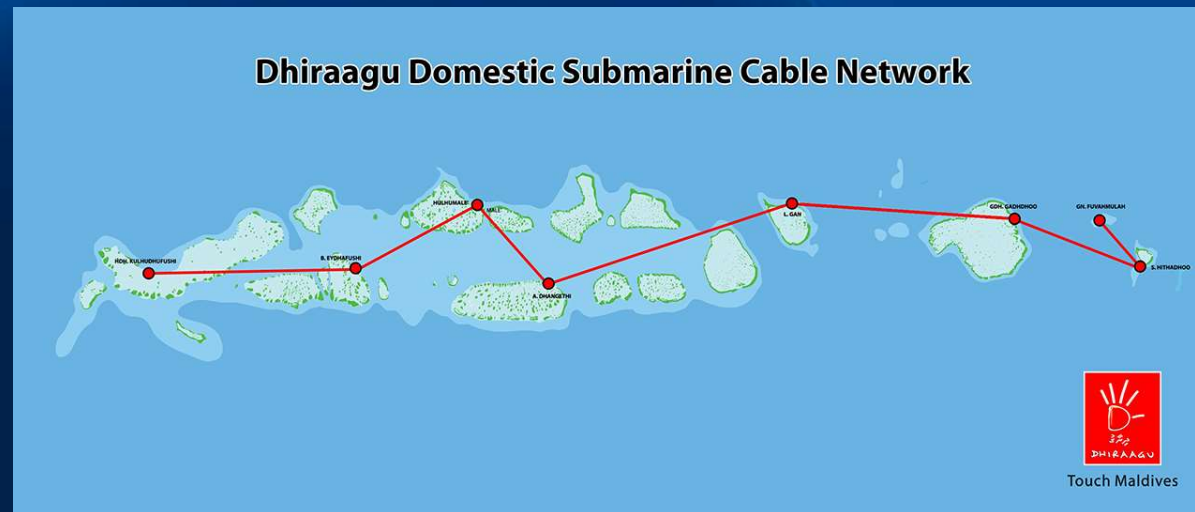

Mobile Broadband

Submarine Cable

15 March 2011

- Connecting the whole Maldives from North to South through a 1,017 km length fibre optic submarine cable.
- The network will strategically include 8 regions,
- With the implementation of this project, quality of service will be significantly enhanced. It will also greatly facilitate e-health, telemedicine, e-government and other such online services in the country

THANK
YOU!
