

### **Intervention by Mongolia on Social statistics:**

Mongolia fully supports the implementation plan for the improving regional strategy on population and social statistics. We appreciate for great work of ESCAP and friends of the chair. We took active part at the development of this document and will be honored to be member of the Steering group once it is established.

Mongolia is planning to develop integrated database, which will include all data of governmental organizations in one database. Especially it will enhance civil registration and vital statistics in terms of the quality implying to data from ministry of health, civil registration authority and NSO Mongolia.

In terms of SDG's, Mongolia has not yet a capacity to produce all social SDG indicators by ourselves alone. A lot of work has to be done. Therefore we will welcome the needed technical support and close cooperation of ESCAP and other UN organizations to develop methodologies, methods and guidelines.
