

Intervention Mongolia on 3a:

Mongolia supports the regional programme, Just one small suggestion for your consideration. There should be a clear linkage between core set and SDG indicators. Regional programme is covering only core set indicators of economic statistics related to the SDG indicators. There are many indicators which are not in the core set of indicators. Also, SDG indicators are identified through tier I, tier II, tier III. Core set indicators are different point of view. Regional programme shall maybe more emphasize on methodologies for new indicators that are not produced by NSI's.
