Sustainable and resilient recovery from the COVID-19 pandemic and SDG implementation in South-East Asia

The fourth South-East Asia Multi-Stakeholder Forum on Implementation of the Sustainable Development Goals was held during 28-29 October 2020 to review progress made towards achieving the goals in the subregion against the backdrops of a post-pandemic recovery and development challenges.

In recognition of the Decade of Action and Delivery for Sustainable Development and the 75th anniversary of the United Nations, the two-day Forum was organized by the United Nations Economic and Social Commission for Asia and the Pacific in collaboration with the Association of Southeast Asian Nations and Chulalongkorn University.

Serving as a subregional preparatory meeting for the regional Asia-Pacific Forum on Sustainable Development and the global High-level Political Forum (HLPF), the forum brought together representatives from government, international organizations, academia and civil society representatives from South-East Asian countries and aligns closely with the theme of HLPF in 2021. The outputs of the Forum will assist member States with Voluntary National Review reporting and SDG implementation amid the COVID-19 pandemic.
