Policy Dialogue on Economic and Transport Development in Border Areas in Eastern South Asia
Shillong (Meghalaya), India, 4-5 December 2013

Concept Note

Background

Remote border areas are junctions for connectivity between countries and very often also poorer places in most countries. In order to alleviate poverty and develop trade and transport connectivity in border areas, many countries opened borders for trade and transport, and granted special policies to them through border special economic zones. Numerous border special economic zones have been established in Northeast, Southeast and Central Asia. Many of them have become trade centres, transport hubs and cooperation centres, greatly promoted local economic development and poverty alleviation in border areas.

The countries in Eastern South Asia, namely Bangladesh, Bhutan, India and Nepal, are the home of large number of poor people living under USD 2 per day and has performed poorly in terms of other key MDGs such as hunger and health. Despite being a geographically contiguous landmass, it has yet to harness potential benefits of closer regional integration and cooperation. South and Southwest Asia remains the least integrated subregion in the world as measured by proportion of intraregional trade, investment, transport connectivity and people-to-people contacts. The proportion of intra-regional trade in South Asia at below 6 per cent of the subregion’s trade, is lowest among different subregions.

Development of border special economic zones in Eastern South Asia will greatly contribute to poverty alleviation, investment and trade promotion, cross-border and transit transport, and development of local economy. Border special economic zones will become bridges for cooperation between the countries. The four countries have strong demand for border trade and cross-border and transit transport but face numerous restrictions. Border special economic zones will provide practical solutions to most existing institutional barriers to trade and transport between the countries in Eastern South Asia.

Objective of the Policy Dialogue

The Policy Dialogue will provide an opportunity to share experience in development of economy and transport in border areas and discuss possible ways for the Eastern South Asian countries to develop the border areas as hubs for their cooperation.

Activities

The Policy Dialogue will include one-day presentations and discussions, and one-day field visit to a border crossing.
Participants

Policy makers from ministries in charge of economic development, transport, trade and commerce, finance (Customs) and border control, and local governments in border areas from Bangladesh, Bhutan, India and Nepal will participate. Business sector relating to cross-border and transit trade and transport will be also invited.

Dates and Venue

The two-day seminar will take place on 4-5 December 2013, at Shillong (Meghalaya), India.

Languages

The working language of the seminar is English.
