Digital transformation of the Russian transport system
Daria Selezneva
Chief expert, International Cooperation Department
26 November, 2019
«Digital Transport and Logistics» Association was established in 2018 by the leaders of the Russian transport industry:
UNIFIED STATE INFORMATION SYSTEM FOR ENSURING TRANSPORT SECURITY

- Ministry of Internal Affairs of the Russian Federation
- Ministry of transport of the Russian Federation
- Federal Security Service of the Russian Federation
- Other federal authorities

139 countries
8,500 transporters
7.5 billion records
### UNIFIED FEDERAL MONITORING AND CONTROL SYSTEM
FOR CARRIAGE OF PASSENGERS BY TRANSPORT

#### FOR THE STATE:
- increasing the level of security and reducing the number of accidents
- increasing the income of taxes and fees
- improving the investment climate
- obtaining reliable information on inter-regional passenger traffic

#### FOR PASSENGERS:
- increase transport security
- increase comfort
- timekeeping

#### FOR BUS STATIONS:
- receiving an additional flow of transport due to crowding out gray carriers from the market
- automation of transportation processes

#### FOR CARRIERS:
- improvement of financial indicators
- the possibility of processing transportation documents at non-equipped stopping points

#### 20 BILLION RUBLES ANNUAL TAX EFFECT

#### 234 MILLION PASSENGER TRANSPORTATIONS ANNUALLY

#### 65-75% AVERAGE FILLING OF BUSES
In order to realize the country's transit potential and ensure the transportation of “sanctioned” cargo through the territory of the Russian Federation, Decree No. 290 of the President of the Russian Federation of June 24, 2019 provides for the creation of a control system and the use of identification means (security seals) that operate on the basis of GLONASS - global navigation satellite system.

**Specifications:**
- **Size:** 155x150x65 mm
- **Weight:** 1.2 kg
- **Housing protection:** IP67

**Made in Russia**
INTERTRAN - the new electronic registration service for internationally traded goods

Up to 30 digital operations

Reduced time of preparing documents

Demonstration of a new electronic service for registering the transport of foreign trade cargo on 4 September 2019 at the Vladivostok Commercial Sea Port on the sidelines of the 5th Eastern Economic Forum
PLATON
BOARD RECEIPT SYSTEM

It provides the collection, processing, storage and automatic transmission of data on the movement of a vehicle having an authorized maximum mass of over 12 tons, and applies to all public roads of federal significance.
