Innovation and  
Sustainability**

# School of Global Studies - Student Life

# Technology for Developing Countries

Students learn evidence based policy analysis skills and examine the role of science, technology, and innovation policies for economic transformation.

It dives deep into the Asia Pacific Information Superhighway initiative and explores how countries are benefiting from the initiative and the ongoing challenges they face.

# Mission of the Masters of Arts in Social Innovation and Sustainability

DEVELOP A COMMUNITY OF PRACTITIONERS AND  
RESEARCHERS WITH THE MINDSET AND SKILLS TO  
TACKLE THE REGION'S MOST PRESSING SDGs.

# Public Engagement

## Next Public Event

Topic: AP-IS - The Digital Economy and Inclusive Development

Location: Asia Centre, Bangkok

Date: September 18, 2019

## Initiative 3 of the Master Plan for the Asia-Pacific Information Superhighway.

School of Global Studies Research Objectives:

- Understand emerging technologies and discern their impact on economies in the region.
- Produce evidence based insights to help policymakers in the development of an inclusive and prosperous ICT environment.

# Case-study: Platforms and The Splintering of the Phnom Penh Transport Economy

How can academic research about ICTs support the reduction of inequalities while fostering technological innovation?

Thank you!
